

Crowdfunding campaign to save science education

Malmö, December 8, 2016–Megalearn AB, a Swedish startup making educational apps, has launched a crowdfunding campaign to get more young people interested in science and technology. Megalearn's solution is an app that is more personal and interactive than school books or YouTube videos.

Megalearn's CEO and Co-Founder, Per Thulin says:

"Science and technology is becoming more and more important, but teachers tell us that their students don't understand why learning these subjects is relevant to their lives. That's why we have set off to connect these two worlds, the world of science, and the world of young people."

Megalearn has partnered up with Abrams & Chronicle Books, the National History of Science and Technology Museum in Stockholm, Malmö Museer, Vattenhallen Science Center in Lund, and the Danish Museum of Science & Technology to offer museum tickets, posters, stickers and more to be purchased through the campaign.

The campaign is live on the crowdfunding website Indiegogo until January 6 2017.
