

WEIGH-A-ROUND PORTABLE SCALE

OVER 95 YEARS OF COMBINED EXPERIENCE MANUFACTURING INDUSTRIAL WEIGHING EQUIPMENT

The B-TEK Weigh-A-Round portable platform scale is built for mobile weighing applications. Inboard wheels are standard for point-to-point straight line mobility. The optional rear mount swivel casters makes maneuvering in tight confines easy. The scale is available in painted mild steel and 304 stainless with a 24" x 18" or 30" x 24" weighing surface. Capacities from 100 lbs. to 1,500 lbs. make the Weigh-A-Round a very versatile scale. The Weigh-A-Round can be paired with simple weight display mounted to the top of the column or customized to meet a unique application requirement. The mounting surface on top of the column can be enlarged to accommodate a weight display and printer or even a counting scale.
