

Specialists in **COLOR RESTORATION & REPAIR**

The Right Business at The Right Time®

An innovative and recession-proof franchise that specializes in the repair & restoration of leather, vinyl, cloth, velour, plastic & more!

Our Story

Who We Are

Leadership is the art of serving others by equipping them with training, tools and people as well as your time, energy and emotional intelligence so that they can realize their full potential, both personally and professionally.

At Color Glo we strive to insure we are doing this every day and exceeding our franchisees expectations. And it works – we’ve been recognized by many franchise and industry leaders for our efforts and excellence!

How Does it Work?

Our focus is restoring and repairing common defects such as worn and faded interior components such as leather upholstery, headliners, burns and broken plastic or composite molding. These problems are found in the interior of every automobile, RV, truck sports vehicle, plane or boat in use today.

We have also developed our CGI Boutique line where we repair and restore shoes, purse, boots, attache's, luggage, handbags, belts, gloves, motorcycle suits and much more!

Our process uses specially formulated proprietary products that are made in the USA. Color Glo re-conditioned items dry in minutes which allows the customer to use their investment almost immediately.

Our Services

For over 30 years Color Glo International has been working with new and used auto dealers, body shops, upholsterers and individual vehicle owners offering a low cost alternative to the increasing expense of replacing interior components that have been damaged in an accident or due to vandalism. The manufacturers of leather, vinyl, plastics and fabric worldwide have accepted our exclusive and proprietary products for use. At present we are successfully servicing vehicles manufactured by every vehicle manufacturer in the world. Color Glo products today are preferred by boat manufacturers and because Color Glo uses environmentally safe water-based dyes that have passed certain vertical burn testing requirements under FAR 25.853 (a) Appendix F part (a) (I) (ii) AMD-25-72 Federal Aviation Regulations and were shown not to add flammability to aircraft leather upholstery we are also found doing a great deal of work in the aviation field on aircraft of all sizes.

What We Offer

What Our Franchises Are Saying

"I started my franchise 30+ years ago and I have never looked back. I am honored to be a part of the Color Glo Family."

Bill Sashse, Franchisee for Colorado Springs, Colorado USA

"The best part of being my own boss is getting to make all of the decisions!"

George Elfering, Franchisee for West Columbia, South Carolina USA

"Having several years of prior experience in the automotive industry, I was blown away with the state of the art technology that CGI - Color Glo International provided."

Ruben Moodley, Master Franchisor, CGI South Africa

"Color Glo Corporate are always there and help us, and with a huge amount of energy which is a great security."

Richard Akesson, Master Franchisor, CGI Sweden
