

Solar Access Program

How it Works

Resonant Energy's Solar Access Program provides qualifying homeowners with solar installations at no-cost, with zero monthly payments, and immediate savings of 10%-30%. You owe nothing before or after installation, and there is a flexible credit requirement.

Where other solar companies require high credit, money down, or long term purchasing agreements with monthly payments, Resonant asks for only a rooftop lease, and gives you a portion of the array's electricity for free. We give preference to low and moderate income homeowners who would like to host systems, but all are welcome to apply.

- Save 10-30% on your electricity bill
- Receive electricity credits from your solar array
- Sign a rooftop lease; make no payments
