### The Samburu Project ANNUAL REPORT 014

## NAVIGATE

# 01 Introduction 04 Programs 09 Events

### **DEAR FRIENDS & SUPPORTERS** of The Samburu Project,

2014 was another successful year for The Samburu Project as we had the great opportunity of continuing our mission to provide clean, safe drinking water to the Samburu people in northern Kenya. While drilling 10 wells and supporting 63 existing well communities in Samburu, Kenya, our organization spent 2014 focusing on documentation, development and strengthening our team on the ground in Kenya.

We were fortunate to have two photographers visit Samburu during the course of the year, Mamen Saura and Daniel Jack Lyons. They both captured incredible images of our work while documenting the impact The Samburu Project has made in so many Samburu communities. This documentation allows us to better share the results of our funding, further developing our relationships with our supporters.

As we have continued to focus on growing our fundraising capacity, The Samburu Project board launched a campaign to support the hiring of a Development Consultant this year. The fruits of these labors will be enjoyed next year when we hire our first Development Consultant.

In addition to this, in the fundraising realm, we held our 2nd annual Samburu Splash Bash at the Santa Monica Bay Woman's Club on September 27th. The food, libations and entertainment were premiere and our audience of Los Angeles power players took it all in. The crowd was lively as they ate, drank, listened and caught up in their VIP lounges. And, it was the most financially successful event in the history of the organization, nearly doubling the funds raised at the inaugural Splash Bash in 2013!

As for other events, our 5th annual Walk for Water in Hermosa Beach on March 30th built upon the success of previous year with more walkers raising more money than ever before. Additionally, we expanded our fundraising reach to Detroit, Michigan with an event at the David Klein Gallery in Birmingham.

On the ground in Kenya, we embarked upon our 8th welldrillsuccessfully completing 10 wells that currently bring clean water to over 10,000 people. Mid-year, we partnered with Amiran Kenya to execute a greenhouse project in the Lolgerded well community. This pilot project will hopefully be the beginning of man greenhouse projects in Samburu.

In other news, we hired Mussa Lekwale to oversee our team in Samburu. He's managing Kenya compliance and supporting the TSP team with documentation while streamlining our overall communication process.

After nine years of operations, it continues to hold true that we could not do this work without all of the people who support our organization. We are thankful to have such a tremendous team of people behind our work. Together, we are helping people live healthier lives.

Sincerely yours, Fuster Josin stil

Kristen Kosinski Founder and Executive Director

# INTRODUCTION

## Give water. GIVE LIFE.

Every day 4,500 children die worldwide due to the lack of access to clean, safe drinking water. Founded in 2005, The Samburu Project offers a simple solution to this extraordinary problem. The Samburu Project provides access to clean, safe drinking water through well drilling initiatives in order to create a solid foundation for community development.

The Samburu Project has drilled 73 wells providing clean, safe drinking water to over 70,000 people in Samburu. With the advent of clean, safe water in The Samburu Project's existing well communities, new possibilities have emerged for the people of Samburu.

### With *clean* water...

**Children survive** 

Communities are empowered

 Women start small businesses

> Communities grow their own food

Girls go to school
People thrive

# PROGRAMS

The Samburu Project embarked on its 8th well drill in July 2014. During this drilling exercise, The Samburu Project had five dry wells, something that has only happened four times before in the history of the organization. Despite this setback, The Samburu Project drilled and equipped 10 new wells, bringing clean, safe drinking water to approximately 10,000 people.

### Wells Drilled in 20141 year • 10 wells • clean water for 10,000

# **CASE STUDIES**

#### NTILAL 2

Location: Archer's Post GPS Coordinates: N 0.755 E 37.890555 Elevation: 856 m

Ronte Lemaramba is a community elder in this community. He says that this well will give his community access to safe drinking water, which is a very rare commodity to them. Before the well, people had to walk 8 km to fetch water. Sometimes on their walk to get water people will encounter wild animals along the way. He recalled an incident where a woman was killed by an elephant while fetching water in 2007.

#### WAMBA MIXED BOYS

#### Location: Wamba GPS Coordinates: N 1.16722 E 37.56694 Elevation: 1150 m

Mr. Maing is the principal at the school. He said that before the establishment of this well, students used to walk for hours looking for water which affected their school learning program. Many times the children would go to sleep without dinner because they didn't have water to prepare their food. Students were constantly getting sick from drinking contaminated water out of hand dug wells. This cost the school a lot of money as they had to pay for their hospital bills. Without acces to clean water, girls also had to go home for a few days each month due to their menstrual cycle. Now that they have a well, more children are in school. There has been a high school retention and performance along with a reduction in occurrences of waterborne diseases.

#### LMARTI

Location: Wamba GPS Coordinates: N 1.700277 E 37.714722 Elevation: 1271 m

Miriam is a charlady for a local women's group. Before the well was built, she used to get very sick as a result of drinking contaminated water from hand dug wells. Now that the well is built, she is okay and rarely gets sick anymore. She also used to walk for hours, taking up her whole day, looking for water. Now the water is a 2 minute walk from her home. Since she doesn't have to spend her days looking for water, she has opened a small retail shop in her home. Her daughter, who is 12 years old, also now has the time and option to go to school

# agriculturalintiatives

In July, The Samburu Project erected a green house in the Lolgerded Well community in partnership with Amiran Farmers Kenya, an agricultural organization that helps young, rural farmers enhance their livelihoods by donating green houses. Pittsburgh Children's Foundation made this possible by funding the Lolgerded Well in 2011. When people ask us, "Why water?" This is it. Beyond quenching people's thirst, clean water offers a multitude of possibilities. In this case, the people of Lolgerded will live healthier lives with access to fresh fruits and vegetables. The opportunity for income generation will present itself too as this community can sell excess produce.

A MITCH PURITY A

# EVENTS

### Walk for Water

### **OIT** The Samburu Project's 5<sup>th</sup> Annual Walk for Water South Bay, CA 3.23.2014

On March 23rd 2014, The Samburu Project held its 5th Annual Walk for Water. The Walk was the most successful one yet with over 300 walkers and raising nearly \$30,000. Before the walk, Fit-On trainer Angela Bennett led the enthusiastic group with a fun warm-up routine. Children learned the importance of water conservation and played in the world of water at the Metropolitan Water District of Southern California's Kid's Corner. After a 4-mile loop between Hermosa Beach Pier and Manhattan Beach Pier, walkers of all ages returned to American Junkie Restaurant where they enjoyed a delicious celebratory breakfast while bidding on some amazing auction items.

### **Woodside Elementary School** Woodside, CA 3.23.2014

The 5th Annual Walk for Water held on March 23rd, 2014 was also a huge success, celebrating the efforts of the online campaign. Over 100 attended the walk and participated in a beautiful Sunday afternoon walk (or run) around the Woodside Elementary School fields. Everyone enjoyed live music performed by local children along with many wonderful smiling faces to celebrate the day.

### SPLASH BASH

### In Detriot...

The Samburu Project held its first Detroit event on May 3, 2014 at David Klein Gallery in Birmingham, Michigan. Thanks to our wonderful hosts, we had the opportunity to introduce our work to 50 or so attendees who donated over \$10,000! Attendees ate delicious food from Plum Market, enjoyed viewing some select photos from The Face of Water, The Samburu Project's photography exhibit and heard TSP Founder, Kristen Kosinski, share the story of The Samburu Project and the thousands of people we have helped in Samburu, Kenya.

The inaugural Samburu Splash Bash at the Santa Monica Bay Woman's Club was a big success, raising over \$120,000. There were over 300 attendees, both long-time and new supporters of the organization. Fun was had by all with delicious food, plenty of drink and spectacular entertainment. Most importantly, the message of The Samburu Project and its impact on the Samburu people was ever present throughout the night with stunning images, and touching stories.
