HEARING LOOPS IN THE NEW YORK CITY METROPOLITAN AREA
As of 15 November 2019

The following institutions have hearing loops installed. Most only have hearing loops in limited areas of the building. This list is updated every few months. If you would like to notify HLAA-NYC about a newly looped venue, please email info@hearinglossnyc.org.

Hearing looped venues are listed by county and by type of facility:

New York City
Public Facilities

Amtrak, New York City Penn Station
234 West 31st Street
Eighth Avenue and West 31st to 33rd Streets
New York, NY 10001
800-872-7245
http://www.amtrak.com/
Hearing loops are installed at ticket windows 7 and 8 and at the information desk and the customer service desk.

Grand Central Terminal
See listing under Metro North, Grand Central Terminal

IDNYC
All IDNYC enrollment centers are equipped with hearing loops to ensure accessibility for hard of hearing applicants.
Locations are listed at http://www1.nyc.gov/site/idnyc/card/locations.page
Website http://www1.nyc.gov/site/idnyc/index.page
Metro North, Grand Central Terminal
89 East 42nd Street at Park Avenue
New York, NY 10017
http://www.grandcentralterminal.com/
Ticket booths numbers 6 and 11 have hearing loops installed. At the information booth in the center of the floor, a hearing loop has been installed at the south facing window. If no one is at that window, go to another window and tell the clerk you need to use the hearing loop and they will move to the south window.

MTA subway system station booths
http://web.mta.info/accessibility/station_booths.htm
All subway information booths in stations in the Bronx, Brooklyn, Manhattan and Queens are looped. If you can’t hear the employee in the booth, ask them to speak into the microphone.

MTA subway system Help Points
http://web.mta.info/accessibility/station_booths.htm
The upper portion of the Help Point is a bright blue light and the lower portion is silver with two buttons: one marked “emergency” and the other marked “information.” By pushing the appropriate button, subway riders are remotely connected with a person who can give directions to another subway station or send help in an emergency. Help Points are generally attached to a support column or a wall and are easily located by the bright blue light. All Help Points are installed with hearing loops; simply set your hearing aid to the t-coil setting, press the appropriate button on the Help Point and wait for the operator to speak to you.

New York City Taxi and Limousine Commission, Taxi of Tomorrow
Since 1 September 2015, New York City requires taxi owners who are replacing yellow taxis to replace them with vehicles that meet the new standards for accessibility, including hearing loops. It will take several years until all vehicles have hearing loops. Customers should look for the hearing loop logo on the outside of the cab. The new rule only applies to yellow taxis. It does not apply to green outer borough taxis, although if the owners buy the Nissan MV200s, those cars will have a loop. Nor do the new standards apply to black cars, or car service vehicles or services such as Uber, Lyft or Via.

Penn Station, Amtrak
See listing under Amtrak, Penn Station
**Manhattan**

**Businesses**

**Apple Store – SoHo branch**
103 Prince Street at corner of Greene Street

New York, NY 10024  
212-873-3400  
http://www.nyhistory.org/visit/accessibility-amenities 

Presentations in the Robert H. Smith auditorium are t-coil compatible; a neck loop should be picked up at the desk just outside the auditorium entrance or at the information/membership desk. The auditorium also has an FM system with headphones, so explain that you want a neck loop. Audio guides are available for several exhibits and can be found at the entrance to that exhibit. You must ask for a neck loop at the information/membership desk on the first floor in order to use the audio guides available in various exhibit halls throughout the building.

Paley Center for Media (previously Museum of Television and Radio)
