Making your photos look their best...photo editing tips

Retired photographer David Day will share his ideas and experience on how to take your photos to a new level of creativity using Apple's Photos app on iOS as well as a couple of excellent third-party editing apps. We will use an iPad for the instruction but will relate to MacOS as well.

After the main presentation, there will be time for Q&A, so if you have an image you'd like to work on with the group input, bring your device and we'll give it a shot.

As usual, we look forward to hearing about any cool new apps you've found, so be ready for

Cya then!
