

Senior Software Developer

121nexus is a technology company focused on automated distribution of information through our cloud-based platform and mobile sensing technology. Our business model is B2B Enterprise SaaS. We are growing revenue 300% year-over-year and are cash flow positive. Our current clients are global leaders in medical device, CPG, and chemical innovation.

We seek a Senior Software Developer to join our growing technology platform group. The Senior Software Developer will work with their peers and lead engineering teams to provide ongoing support for our global client base, implement new technologies, lead research and development efforts for emerging technologies and innovative processes.

Solid communication and teamwork skills are essential for working with our close-knit team, and the Senior Software Developer should have a strong initiative and desire to make an impact within the organization. The role requires strong architectural skills, a desire to lead, and willingness to stay abreast of not only new technologies, but the latest and best practices in software development, software architecture, and leadership of software teams.

Strategic thinking, innovation, analytical insight, communication, and cross-functional teamwork are essential to the success of every element of our business. We take smart risks, solve important problems and adapt and iterate quickly. We are looking for someone who is passionate about this space, is ready to join a team that is made stronger through innovation and collaboration.

About you:

You're someone who wants to see the impact of your work making a difference every day. Your friends describe you as extremely tenacious, thorough, and detail-oriented. You are someone with high standards who's not afraid to push us to be better by example, and who will take pride in 121nexus like we do.

Roles & Responsibilities:

- Lead development of the 121nexus Public API
- Lead and mentor junior software developers
- Provide effective qualitative and quantitative metrics on development progress to leadership
- Provide ongoing support for new and existing 121nexus clients and partners
- Innovate on 121nexus software development processes and implement new best practices
- Implement new features and deploy new technologies within the 121nexus platform
- Assist with devops and deployment of code and infrastructure
- Assist with buildout of internal tools
- Refactor and optimize existing code within the 121nexus platform
- Write test suites for quality control of new and existing features
- Locate and fix bugs within the 121nexus platform

Required Qualifications:

- Bachelors degree or higher in Computer Science or related field
- At least 5 years of professional software development experience
- Strong experience with web development principles and architectures
- Mastery of software development best practices, including testing and version control
- Experience with relational database systems
- Experience with scalable software architectures and data systems for the web
- Experience in working with web development frameworks
- Strong javascript skills
- Strong verbal and written interpersonal and communication skills
- Strong time management skills and experience with effectively working under deadline
- Comfort with significant responsibility for successful implementation of key features and projects and communication of results
- Desire for professional growth as a developer and team leader

Preferred:

- Experience in React.js development
- Experience with Ruby on Rails development
- Experience with devops on cloud infrastructure (AWS/Heroku)
