Senior Front End Developer

121nexus is a rapidly growing start-up based in downtown Boston which is creating a universal platform for ingesting and distributing item-level product information. At it's core our software connects unique products to people so that they can learn about that exact product. This translates to use cases in a host of industries, but we're focusing on healthcare at this stage. Why healthcare? One reason we're most passionate about is providing live-saving instructions, safety, and recall information to people at the exact time that they need it.

We seek a Senior Front End Developer to join our platform technology group. The Senior Front End Developer will work with our platform group in an Agile environment to design and develop front end application code, implement new technologies, and provide leadership in best practices for front end development. The candidate should have strong experience and understanding in the latest front end design patterns, technologies, and scalable architectures.

Strong front end design and architecture skills and robust experience in designing and implementing front end for web-based applications are essential for the role, as are a strong desire to stay abreast of the latest technologies and best practices, and to quickly filter those developments into actionable items

Strategic thinking, innovation, analytical insight, communication, and cross-functional teamwork are essential to the success of every element of our business. We take smart risks, solve important problems and adapt and iterate quickly. We are looking for someone who is passionate about this space, takes ownership of their ideas, and is ready to join a team that is made stronger through innovation and collaboration.

About you:
You're someone who wants to see the impact of your work making a difference every day. Your friends describe you as extremely tenacious, thorough, and detail-oriented. You are someone with high standards who's not afraid to push us to be better by example, and who will take pride in 121nexus like we do.

Roles & Responsibilities:
- Provide leadership and participate in design and development of the 121nexus front end
- Facilitate the creation of maintainable front end code in an agile environment, providing mentorship and guidance as needed to members of the team
- Present and substantiate front end architectural, design, and technology choices

- Stay abreast of cutting edge front end best practices and technologies and bring these findings to the team
- Provide consultation and guidance to team members on front end development strategies and architectural best practices
- Perform peer design and code reviews

Required Skills & Qualifications:
- 6+ years of relevant experience and Bachelor's degree or higher
- Excellent analytical, design, and prioritization skills
- Excellent verbal and written communication skills
- Excellent time-management and triage skills
- Strong development experience with front end JavaScript frameworks

Desired Skills:
- Deep understanding of front end architecture and design patterns
- Robust experience with React.JS development
- Experience designing, implementing, and maintaining front ends for high volume, highly scalable, high availability SaaS applications
- Experience deploying designing and implementing front ends for cloud-hosted products
- Experience with continuous integration and automated testing strategies for front end
- Mastery of cross-browser and cross-platform markup and layout strategies
- Experience implementing responsive design techniques
- Ability to lead and mentor new team members
- Strong desire to learn new technologies and processes and quickly put them into practice
- Experience with Agile development methodologies
