

Senior Mobile Developer

121nexus is a rapidly growing start-up based in downtown Boston which is creating a universal platform for ingesting and distributing item-level product information. At it's core **our software connects unique products to people** so that they can learn about that exact product. This translates to use cases in a host of industries, but we're focusing on healthcare at this stage. Why healthcare? One reason we're most passionate about is **providing live-saving instructions, safety, and recall information to people at the exact time that they need it.**

We are looking for a senior mobile developer responsible for the development and maintenance of applications aimed at a range of iOS and Android devices. Your primary focus will be the development of a mobile SDK for iOS and that integrates with the 121nexus platform and back-end services. You will be working alongside other engineers and developers working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and the creation of quality products is essential.

Strategic thinking, innovation, analytical insight, communication, and cross-functional teamwork are essential to the success of every element of our business. **We take smart risks, solve important problems and adapt and iterate quickly.** We are looking for someone who is passionate about this space, takes ownership of their ideas, and is ready to join a team that is made stronger through innovation and collaboration.

About you

You're someone who wants to see the impact of your work making a difference every day. Your friends describe you as extremely tenacious, thorough, and detail-oriented. You are someone with high standards who's not afraid to push us to be better by example, and who will take pride in 121nexus like we do.

Roles Responsibilities:

- Design, build and maintain mobile applications and SDKs for the iOS and Android platforms
- Ensure the performance, quality, and responsiveness of applications and SDKs
- Create and maintain documentation for SDKs including implementation guidelines
- Collaborate with a team to define, design, and ship new features
- Identify and correct bottlenecks and fix bugs
- Help maintain code quality, organization, and automatization

- Provide support to sales teams both internal and channel partners as it pertains to implementation of SDKs

Required Qualifications:

- Proficiency with Swift
- Experience with Apple frameworks such as AVFoundation, CoreGraphics, UIKit, Core Data, etc.
- Experience with offline storage, threading, and performance tuning
- Familiarity with RESTful APIs to connect mobile applications to back-end services
- Knowledge of other web technologies and UI/UX standards
- Understanding of Apple's Human interface guidelines (HIG)
- Experience with performance and memory tuning with tools such as Instruments
- Familiarity with cloud message APIs and push notifications
- Proficient understanding of code versioning tools such as Git, Mercurial, or SVN
- Familiarity with continuous integration tools such as Jenkins
- Experience being part of a development team utilizing agile methodologies
