

SINK CARE

CLOISSONNE WITH NICKEL BASE

Cloisonné is colored glass fused to a nickel plated copper base.

Gentle soap and water will maintain the sink.

No abrasives or harsh chemicals should be used. Avoid the use of antibacterial soap, as it also has the tendency to harm the patina finish.

Satin Nickel finish is considered a “precious metal” and should be cared for as such.

Never use any abrasives or harsh chemicals on the sink.

As nickel will darken over time, a mild silver cream will restore the nickel finish.

Each nickel sink is coated with a clear paste wax which will delay the darkening of the nickel.

The clear paste wax will wear away with cleaning and should be reapplied.
