KENKEN

Fill the grid with digits so as not to repeat a digit in any row or column, and so that the digits within each heavily outlined box will produce the target number shown, by using addition, subtraction, multiplication or division, as indicated in the box. A 5x5 grid will use the digits 1-5. A 7x7 grid will use 1-7. For more info: [nytimes@kenken.com](mailto:nytimes@kenken.com). Last week's answers: page tk.
