

In *Finding Alaska's Villages: And Connecting Them* Alex Hills tells how he traveled Alaska by bush plane and snow machine, braving extreme weather and rough terrain to bring telephone service to small villages across the big state. Then he developed a new public radio station to serve the people of Alaska's huge northwest region.

In the book Alex also describes how he helped the state's telecom pioneers bring about an innovation that would forever change rural Alaska. It took some creative technical work — and some convincing of government officials and corporate executives — to make it happen. Soon the needed telecommunication services — two-way medical communication, a phone in every house and business, and radio and television programs — were available in Alaska's villages.

It's a fascinating story, and it's all in Alex's new book, *Finding Alaska's Villages: And Connecting Them*.

The new book can be ordered from any bookseller, and it can be ordered, in eBook, paperback or hardcover version, from Amazon at:
