Three steps to order your YETI SNOWMX

1

CHOOSE YOUR LENGTH

YETI SNOWMX is designed with aerospace materials such as carbon fibre, billet aluminum and titanium. Equipped with the **SYNCRODRIVE** belt drive system, and the **MAXTRAX II** lightweight track, **YETI SNOWMX** delivers the most of your MX bikes horsepower to the snow.

120

For nimble, fun, ditch banging and the ultimate in lightweight rippin'! Suggested for more aggressive riders who like to leave their mark wherever they ride.

129

Extra row of paddles on the ground, keeping it nimble while giving you lightweight awesome climbing power. Best of all around riding home and mountains.

137

Effortless mountain cruising in all snow conditions, but favouring the deep, deeper tree riding, and high horsepower turbo big hill climbing.

MAXKEEL

Exoskeleton design, with extra deep centre keel and side hardox cutting blades offers you the ultimate control of your yeti on all snow conditions.

SPINDLE

Reinforced with 3 strong carbon fibre blades, this spindle has its aluminum billet tightened with titanium fasteners producing a dependable and solid mount to the maxkeel.

SYNCRODRIVE

Engineered by C3 POWERSPORTS, this belt drive system allows you to change gearing easily. Featuring an "simple to tension" belt, in a virtually maintenance free package.

SUSPENSION

RAPTOR-RRS "Piggy back" reservoir shock system, with 20 clicks compression dampening adjuster for ultimate control trail with ease. RRS shock system increases the YETI total suspension travel up to **22"** for higher performance

CHASSIS

With 16 layers of carbon fibre, this precise CNC trimmed chassis is built to the finest aerospace standards. The resilience and light weight of this design will push your ride to a new level.

MAXTRAK II

Lightweight single ply design, with 2.5" lugs armed for the deepest powder. Accelerate harder with more available horsepower during wide open blasts.

YETI SNOWMX is equipped with a bike adapter kit for most MX BIKES available. Check our online bike adapter chart for more info

2

CUSTOMIZE YOUR YETI

Customize your YETI SNOWMX with a large selection of anodizing packages provided to match your bike (Snowcheck only)

Standard package come in Silver/black

ANODIZING COLOR PACKAGES

Make a statement with a large selection of graphic packages provided to match your bike (Snowcheck only)

Standard package come in Silver/black

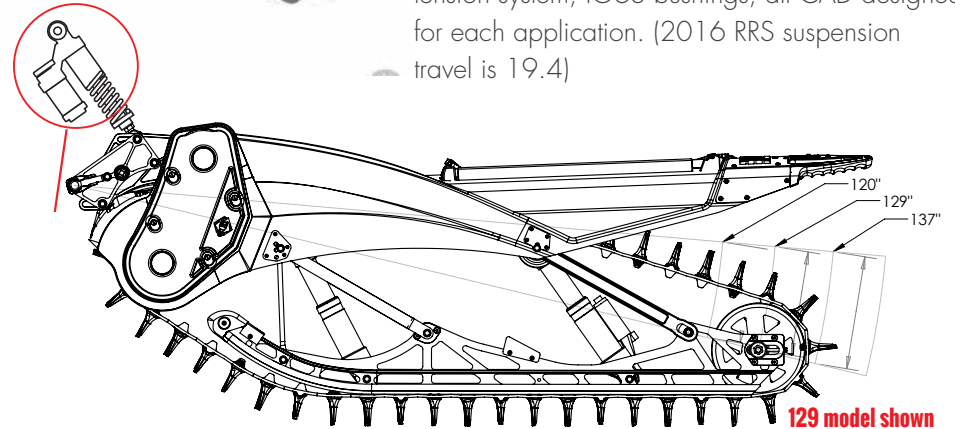

GRAPHIC COLOR PACKAGES

YETI SNOWMX models sold in USA come standard with the RRS suspension. Outside of USA, RRS suspension is optional. See your authorized dealer for more info.

RRS "Piggy back" reservoir shock system, with 20 clicks compression dampening adjuster for ultimate control. RRS is co-designed by RAPTOR Performance Shocks (leader in snowmobile suspension systems) and C3 Powersports (home of the YETI SMX). 2017 RRS shock system increases the YETI total suspension travel up to 22" for higher performance. RRS long travel kit includes an automatic spring loaded chain tension system, IGUS bushings, all CAD designed for each application. (2016 RRS suspension travel is 19.4")

DOUBLE YOUR SUSPENSION TRAVEL

YETI LENGTH STANDARD TRAVEL + RRS TRAVEL = TOTAL TRAVEL

SMX120:	11"	+	9"	=	20"
SMX127:	11"	+	10"	=	21"
SMX137:	11"	+	11"	=	22"

THE YETI SNOWMX STANDARD 11" OF TRAVEL AT THE REAR AXLE PLUS THE EXTRA 1" OF RRS TRAVEL EQUALS THE TOTAL SUSPENSION TRAVEL LISTED ABOVE FOR EACH YETI SNOWMX LENGTH

3

CHOOSE YOUR ACCESSORIES

YETI SNOWMX comes with all sorts of products and accessories available from your authorized YETI SNOWMX dealer. For more information please visit our website at: www.yetisnowmx.ca
