

# UCi2i Connect

## Video endpoint management and support service

Our goal is simple - to offer an all-in-one, affordable and fully supported video calling and conferencing service for every type of organisation, connecting users face to face, wherever they are.

The UCi2i Connect service plan is a fixed, affordable monthly subscription with unlimited usage - as easy to use, and as simple to buy, as your fixed mobile phone tariff. UCi2i Connect enables your video device (hardware endpoint, PC, laptop, mobile or tablet) to call other video devices including Virtual Meeting Rooms (VMRs), delivering a secure, supported, high definition and on-demand video experience for use inside and outside of your organisation.

Minimise the need for local and international travel, saving time, money and reducing your carbon footprint.

Enjoy secure video calling in high definition.

Increase collaboration, productivity and profitability.

Enjoy around the clock, global support - real people, speaking your language.

### One to one video calling, at your fingertips.

Video enable your business, with secure, high definition and fully supported, one to one video calling from UCi2i. Wherever you are.

#### What comes as standard?

- V-Connect video client\* ✓
- VMR address \*\* ✓
