

RECOVER US SOCCER ATHLETE COLLAPSE GUIDELINES

Non-contact collapse of an athlete, coach, referee or bystander is presumed to be sudden cardiac arrest.

While not common, an immediate and appropriate on-site response with bystander intervention is critical for a potential positive outcome. As part of your emergency action plan (EAP) "hands only CPR" with the use of an (AED) should be incorporated as part of your program. All staff and players should be educated and trained on this skill with access to an automated external defibrillator or AED either on site or within a rapid response by local emergency personnel.

STEP 1

IDENTIFY COLLAPSED INDIVIDUAL

STEP 2

CALL FOR HELP AND CALL 911, SEND FOR AN AED

STEP 3
