

EXPERIENCE THE PASSION OF
FIRE IN THE RAINSTORM

THE FIRST SOLO PIANO RECORDING FROM
ACCLAIMED KEYBOARD ARTIST KORI LINAЕ CAROTHERS

On her second trip to Will Ackerman's legendary Imaginary Road Studios, Kori Linae Carothers left her arsenal of keyboards behind and flew solo on piano. Under the guidance of Ackerman and ace engineer Tom Eaton, Carothers uncovered her muse in all her naked, passionate glory, mining a vein of emotional purity and artistic integrity that elevates her musical reputation by leaps and bounds. *Fire In The Rainstorm* is a milestone in this artist's career and a must have for lovers of solo piano recordings.

I would listen to Kori Linae Carother's album just on the title alone...*Fire In The Rainstorm*... delightfully ambiguous... intriguing. It is impossible...or is it? I thought [Kori's] last album was her best, but she has proved me wrong. The degree of depth and maturity on this recording is remarkable. Kori shares with us twelve wonderful tales...This is her everyday life set to music, and the music is profound. The album is dedicated to her daughter and as many know, having a child can bring to your life not only joy, but also perspective.

RJ Lannan/Zone Music Reporter

Kori's music has evolved in its complexity and richness over the years, but the strength of her artist voice is powerful and singular enough to unify all of her work as purely her own. In her latest work, *Fire in*

the Rainstorm, there is a freedom and expansiveness that is the product of an artist who has come utterly into her own with poise and confidence. I honestly believe this is her finest work yet and that we're watching the unfolding of a very important player on the contemporary musical scene.

Will Ackerman

By stripping away her keyboards and baring her soul through the piano's ivories, Kori Linae Carothers' music has reached a new level of immediacy and intimacy. Carothers has always had an amount of dynamism in her music, and there is plenty of that here as well. However, on *Fire in the Rainstorm* she displays an uncommon level of shading and nuance that could only be achieved by "going back to basics" and letting a piano be her voice. It's certainly her most self-assured recording to date and a pure delight.

Bill Binkelman/Zone Music Reporter
