VACANCY: This is a new position.

SALARY: Start: $40,742/Yr 1: $47,922

LOCATION: Fulton County Department of Information Technology
No County Residency Required.

JOB SUMMARY: This position involves responsibility to create, operate, administer and maintain a county-wide Geographic Information System (GIS). The job duties also include the responsibility to identify data sources, collect and update data for GIS projects, maintain security and control of digital data and databases as well as establishing GIS procedures and protocols for system use and operations.

Creating cooperative agreements with other agencies for data acquisition and data sharing, working with other agencies to achieve project goals and integration of the County GIS into local projects, providing assistance to local municipalities through map making or modeling are also key responsibilities of this position.

Lastly, this person will also provide technical support to county departments in the development of GIS applications to meet operational needs, create and maintain maps for various departments and prepare and administer GIS related state and federal grant applications.

APPOINTMENT: A provisional appointment will be made of a candidate meeting the following minimum qualifications either:

(A) Graduation from a regionally accredited or New York State registered college or university with a Bachelor's Degree in architecture, civil engineering, planning, computer science, urban geography or related field and one year of experience in computer applications involving a geographic information system; or

(B) Graduation from a regionally accredited or New York State registered college or university with a Bachelor's Degree and two years of experience in computer applications involving a geographic information system; or

(C) An equivalent combination of training and experience as defined by the limits of (A) and (B) above.

SPECIAL REQUIREMENTS: None
