

6th Grade

A NOTE FROM THE TEACHER...

This month in science, students will be finishing up their study of the atmosphere and weather. We will then begin our study of the universe. Our unit on the universe will focus on the major components of the universe, the phases of the moon, and the way those phases affect the tides. It will include two large projects to allow students to explore these topics in greater depth based on their individual interests.

ELA students will now be working at centers Monday-Thursday with a quiz every Friday. The centers will help us get ready for increased responsibility of 7th grade and allow Mrs. King to work with small groups on their biggest needs. We will be reviewing all standards from last semester.

WE'RE SO EXCITED ABOUT...

BENCHMARKS!!!!

Our students did an amazing job on their district benchmark assessments in MATH and ELA. They were rewarded with a DJ party.

Thank you so much for all the work you did with your students at home!

THIS MONTH,,,

Continuing on our journey through history, students will be studying Ancient China this month in social studies! We will cover the civilization's society, politics, economic systems, and geography along with how Ancient China has impacted life today. This unit has great timing as Chinese New Year's is at the end of the month, so we will have a celebration in class!

In math, we will be learning about reading, writing, and evaluating expressions. Ms. Ford will now be teaching all but one math class.

AND, DON'T FORGET...

January 16th NO SCHOOL
Students will be out of school in observance of the Martin Luther King Holiday.

**January 19th Pizza and
Painting Art Night**
5:30pm-7:00pm
