Calculators are used very little in class during the school year. However, we do require seventh graders to have calculators at testing. If you do not already own a calculator, please do not purchase an expensive calculator.

There are many great options under \$15, like a TI-30xs or TI-30xa.

## NOVELS

Students are responsible for getting these novels on their own. The school does not provide these books. Students may buy their own or check them out from a library. We prefer students have the book form, rather than it being on their electronic devices (easier to make annotations/notes in the book). Either way will work, though. Some kids also opt to have both the book and it on their electronic devices.
