**APPLICATION INSTRUCTIONS:** As with any medical device, always refer to the full instructions for use prior to application.

1. Hold the top of the dressing and remove the large blue liner.
2. Place the exposed adhesive on the skin and starting from the centre, smooth over skin to ensure good adhesion.
3. Remove the remaining blue liner, placing the adhesive then smoothing towards the edges.
4. Carefully peel off the paper frame, smoothing the edge onto the skin as you go.
5. After the dressing has been applied and smoothed down, apply the securement strips to the outer edges of the dressing. Ensure the bottom securement strip is placed beneath any exiting lines.
6. Apply light pressure to the perimeter to confirm securement. Place the documentation label and use in accordance with your facility’s protocol.

---

**SITE PREPARATION**

- Read precautions and warnings in package insert prior to use.
- Prepare the site according to your facility’s protocol.
- Allow all preps to dry completely before applying the dressing to prevent skin irritation and to ensure good adhesion.
- Do not use skin barriers or tackifying agents as it may negatively affect adhesion.

**SITE CARE:**

1. The site should be observed daily for signs of infection or other complications.
2. Dressing changes should occur at least every 7 days and may be needed more frequently with highly exudative sites or if the integrity of the dressing is compromised.

**DIRECTIONS FOR REMOVAL:**

1. Change dressing as dictated by facility protocol.
2. Gently tear perforation at the centre of the bottom securement strip and slowly peel away.
