What's Sake?

Brewed from four ingredients - rice, water, yeast, and koji, sake is Japan's national beverage. Unlike wine, sake is brewed and categorized by grade as opposed to varietal and vintage. While rice type and water are important factors, it is the yeast and koji - a unique spore found on rice - that have the greatest role in a sake's flavor and aroma.

Flavor profiles range from rich and earthy to light and delicate. While not a strict principle, the three lower grades (Junmai, Honjozo, Tokubetsu Junmai) tend to be more robust, the higher grades (Junmai Ginjo and above) subtler, elegant, and nuanced.

As well as by the glass, all sakes are available by the bottle. If you are interested in a specific sake for purchase by the bottle and would like a small (0.5 oz) sample, please inquire with your server.

What's Shochu?

Whereas sake is brewed from rice, shochu is distilled from rice. However, shochu will often contain a secondary distillate - barley or sweet potato being the most popular.

Mixing with water is customary based on preference, type of shochu, and season. Shochu makes its home in izakaya, being the perfect counterpart to rich foods.
