

**LAKE 3 (MIXED SPECIES)  
20 ANGLERS MAXIMUM**

This elongated coarse pool can accommodate 20 anglers and has a long island stretching directly down the centre of the water. Pole down the edge and on the deck down the track are successful tactics for carp and tench, but the Method feeder or bomb to the island tend to produce the best results at this time of year. Use dead red maggots or worm tails on the hook to take carp to double figures, bream and tench to 8lb and specimen perch to over 4lb.

**LAKE 1 (CARP)  
FOUR ANGLERS MAXIMUM**

This fully matured lake is the place you need to be if you're after your new personal-best carp, as specimens to well over 30lb are in here. As only four people are allowed to fish at a time, you can have a shot at some truly exclusive fishing without being bothered by any other anglers. Those who catch successfully use boilies, pop-ups and corn over beds of the same feed presented in PVA bags. Target the central island or the southern bays for the best results.

**LAKE 2 (CATFISH/CARP)  
FOUR ANGLERS MAXIMUM**

Boasting carp to 30lb and catfish to over 50lb, Lake 2 has anglers flocking from all over the country to come and fish its banks. Natural baits including maggots, lobworms and slugs are fantastic here, particularly for the catfish. These can be fished down the edge at night and tend to produce the better stamp of fish. Alternatively, pungent boilies, particularly of the crab or shellfish variety, will still catch both carp and cats throughout the day. Only four anglers are allowed to fish here at a time.

**FISHERY OF THE WEEK SOUTH**

**HAVE THE MANOR TO YOURSELVES...**

KENT'S Manor Fisheries has an array of features to target on each lake - islands, bays, weed beds and rushes. The night membership scheme is a must if you're after a new personal best catfish or carp. To the left is our lake-by-lake guide to what's on offer here.

Catfish are a prime target in Lake 2 at Manor Fisheries.
