

The logo for mySidewalk, with 'my' in a teal color and 'Sidewalk' in white.

A tool that connects data, people, and places.

Simplify the way you access, analyze, and share community data.

Save Your Team Time | Get Reliable Answers | Pinpoint Community Needs | Improve Communication

- + Answer questions about any state, city, zip code, school district, neighborhood, or block group in the country with access to **hundreds of datasets** available as interactive maps and charts.
- + Generate and **share reports** to provide stakeholders with a more complete understanding of a community or project area.
- + Perform powerful data analyses in minutes using any of mySidewalk's popular, **research-based Templates** (now applicable to any geography).
- + Easily **add your own data** and **custom project boundaries** to proactively pinpoint residents' needs, map improvements over time, and find answers for specific places.
- + Create your own data Templates, maps, and data lists for **repeatable analysis**.
- + **Centralize your data** and empower different types of teams to quickly access the data they need to make decisions.
- + **Instantly compare** the demographic and socioeconomic profiles of counties, cities, zip codes, neighborhoods, and your custom project areas.
- + Make confident, informed decisions with the most **up-to-date data** from the most reliable sources.
- + Tell simple, visual, **data-driven stories** using interactive, sharable project maps.
- + Engage members of the community and internal teams with tools that make it easy to **gather ideas and feedback** on your work.
