2017 Annual Report
Our Mission

Humans for Education strategically delivers innovative solutions and quality education to combat the global educational deficit. Our programs help schools become economically self-sufficient and focus on developing curriculum and life skills to improve people’s quality of life.

"If you give a man a fish, you feed him for a day. Teach a man to fish, and you feed him for a lifetime."

-Maimonides

We achieve our mission by delivering innovative solutions that allow local schools to become self-sufficient in the long term.
The Education Crisis

Education empowers children and gives them the tools they need to build better lives. It allows them to break out of a cycle of poverty perpetuated by illiteracy and disease. However, nearly a billion people today remain illiterate.

The global youth literacy rate (ages 15-25) increased from 83% in 1990 to 91% in 2015, while the adult literacy rate (ages 15+) increased from 76% to 86%.

In 2015, the U.N. named a Sustainable Development Goal to ensure that all girls and boys complete free, equitable, and quality primary and secondary education by 2030. The world is getting better.
2017 At A Glance

January
Began creating our Health and Sanitation program and our School Assessments

March
-Mpopongi Primary School receives cattle, kicking off our first Revenue Generating Program
-Additionally, five handwashing stations are implemented.
-India Nite Fundraiser: $1,000

April
-New partner school accepted: Destiny Shaper Primary School
-Officially finish policy manual
-Pickleball fundraiser: Over $1,000

May
-Accepted into the YouTube Nonprofit Program and Google AdWords Grant
-Fairport District Simplified Rotary Grant: $1,000

June
Destiny Shaper receives Laptops and internet access, Water filters, and Handwashing stations

July
Began writing children's book

September
-Cows for Destiny Shaper purchased
-Cows for Mpopongi sold
-WASH classes taught
-Farash Foundation Grant: $7,500

November
Successful fundraisers: 26for26, Vie2Cycling, Giving Tuesday

December
Sold cows for Destiny Shaper
Bought sheep for Destiny Shaper
Our Programs

Our various programs aim to improve school conditions for students and provide schools with the tools they need to become self-sufficient.

1. Revenue Generating Program
2. Water, Sanitation, and Hygiene (WASH)
3. Lifetime Scholarships
1. Revenue Generating Programs

At the heart of our strategy is the Revenue Generating Program (RGP). This program is designed to help our partner schools become economically self-sufficient so that they can focus on curriculum development and building life skills.

Our two partner schools in Kenya currently have an RGP that focuses on livestock. Every season, cows and sheep are purchased, raised, and then sold. The revenue from this is used to buy supplies and equipment, hire new teachers, upgrade facilities, and to buy a new herd to keep the program running.

</tr>
</tbody>
</table>
2. Water, Sanitation, and Hygiene (WASH)

Every child has the right to proper health and sanitation, which is why we made the WASH program our priority.

Poor WASH is the main cause of cholera and diarrheal disease, which remains the second leading cause of death in sub-Saharan Africa.*

The WASH program includes the installation of water filters and containers, handwashing and drinking stations, education about the importance of WASH, menstrual pads, and sex-ed classes.

All of our students now have:

✔ Water filters
✔ Storage containers
✔ Drinking stations
✔ Handwashing stations
✔ Menstrual pads

*Prüss-Ustün et al (2014)

WASH programs reduce the risk of our students catching easily preventable diseases, allowing them to stay in school longer and make the most of their education.
3. Lifetime Scholarships

There are many children who want to go to school, but can't because their families cannot bear the financial burden. Some of these children are forced to marry early; others spend their time helping their family with the farm.

Our scholarship program helps take the financial burden of an education off of the students' family. This allows the student to focus on receiving a quality education without their family having to worry about how to support themselves.

Our Scholarships Cover:

- Textbooks
- Uniforms
- School Supplies
- Shoes
- Tuition
- Meals
- Hygienic materials
Schools

Mpopongi Primary School

Students Served: 570
Schools

Destiny Shaper Primary

Students Served: 118
During our first full year, we have collected promising data for our programs. As shown above, our preliminary results indicate that baby, middle, and top classes have a substantial increase in grade improvement. More data will need to be collected to conclude whether classes one, two, and three are improving, although this data suggests a trend towards an increase.

Additionally, the handwashing stations and water filters seem to be used each day but most students. Our data indicate that the girls tend to prefer the water filter over the boys, into the end of the semester. The handwashing data does not show a large difference between the usage of the girls and boys.
Health records and hospitalizations visits are all recorded by our ground team in Kenya. After the implementation of our WASH program, we see less disease and the schools are spending less money on the hospitalization of their students.

The data collected are a compelling start to our programs. This data shows that our programs are being used and seem to be positively affecting the school and students.
In 2017, Cait Fallone came to Humans for Education wanting to build an educational program on sexual health and education.

Her goal was to create a program that gives our students reusable pads and teach them about the importance of sexual health. Cait, built online classes to allow students and teachers access always. In addition, she created examinations to look at how well people absorbed the material. During our first year, we only gave the classes to the teachers to gauge the response and ease of learning.

Below are the results of Cait’s painstaking work.
We found no difference in score based on school

250 girls at our schools received pads in 2017

Both female and male teachers performed equally as well on our exams

78.5% was the average score on our exams by teachers

We found that our teachers scored around 78.5% on our exams. We have gathered the most frequently missed questions and are teaching a follow-up class in those specific areas.

This program empowered our teachers to speak up about issues at school and to brainstorm on how to deal with these issues. The teachers will be re-trained each year and this year we are opening up the class to students.
2017 Finances

Support Income

Starting Balance in January 2017 - $23,575.24

$34,294.15 Total Giving

- Individual Contributions: $11,347.03
- Grants: $8,500.00
- Fundraising Events: $14,447.12

Program Expenses

- M&G (Administration): $783.48
- Fundraising: $648.38
- Program: $43,381.17
Thank you for your support in 2017!
