CARAPAX OFFSHORE FARMING BUOY

A farming buoy developed for high energy offshore farming of mussels and oysters. Manufactured from durable High Density Polyethylene (HDPE) plastic in order to withstand tough offshore conditions. Pressurised to 1 bar of pressure to keep the float intact even when submerged to 10 m of depth. Standard sizes of 230 L (3 m long) and 155 L (2m long), diameter of 315 mm and a wall thickness of 10 mm. Other sizes can easily be custom manufactured. Ships economically in a standard shipping container with a 40 ft HC container fitting 224 pc 230 L floats or 336 pc 155 L floats.
