Mounting on ceiling

PLEASE NOTE: have this lamp installed by a qualified professional.

Step A. Screw in both eye-bolts in the ceiling. Use appropriate mounting method for your ceiling. **(plugs not included)**

Step B. Guide the cotton cord through the hooks.

Step C. Guide the cotton cord through the holes in the wooden fixture.

Step D. Tie a knot to secure.
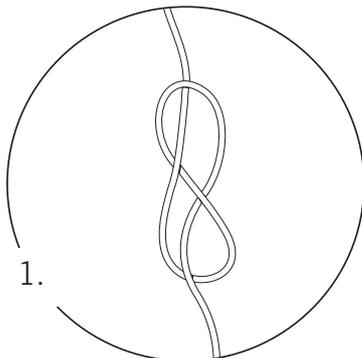

Step E. Hanging the lamp horizontal:

This is, and obviously so, a natural material. It might occur that the lamp is not perfectly horizontal the first try. To adjust, turn the knot in step 3. (bottom right of this page) a half or a quarter turn. This might take a little tinkering.
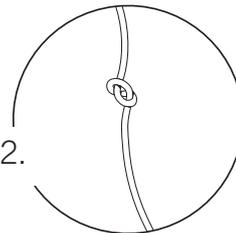

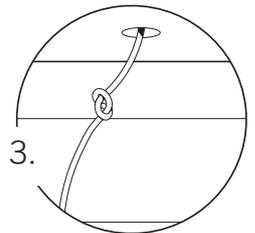

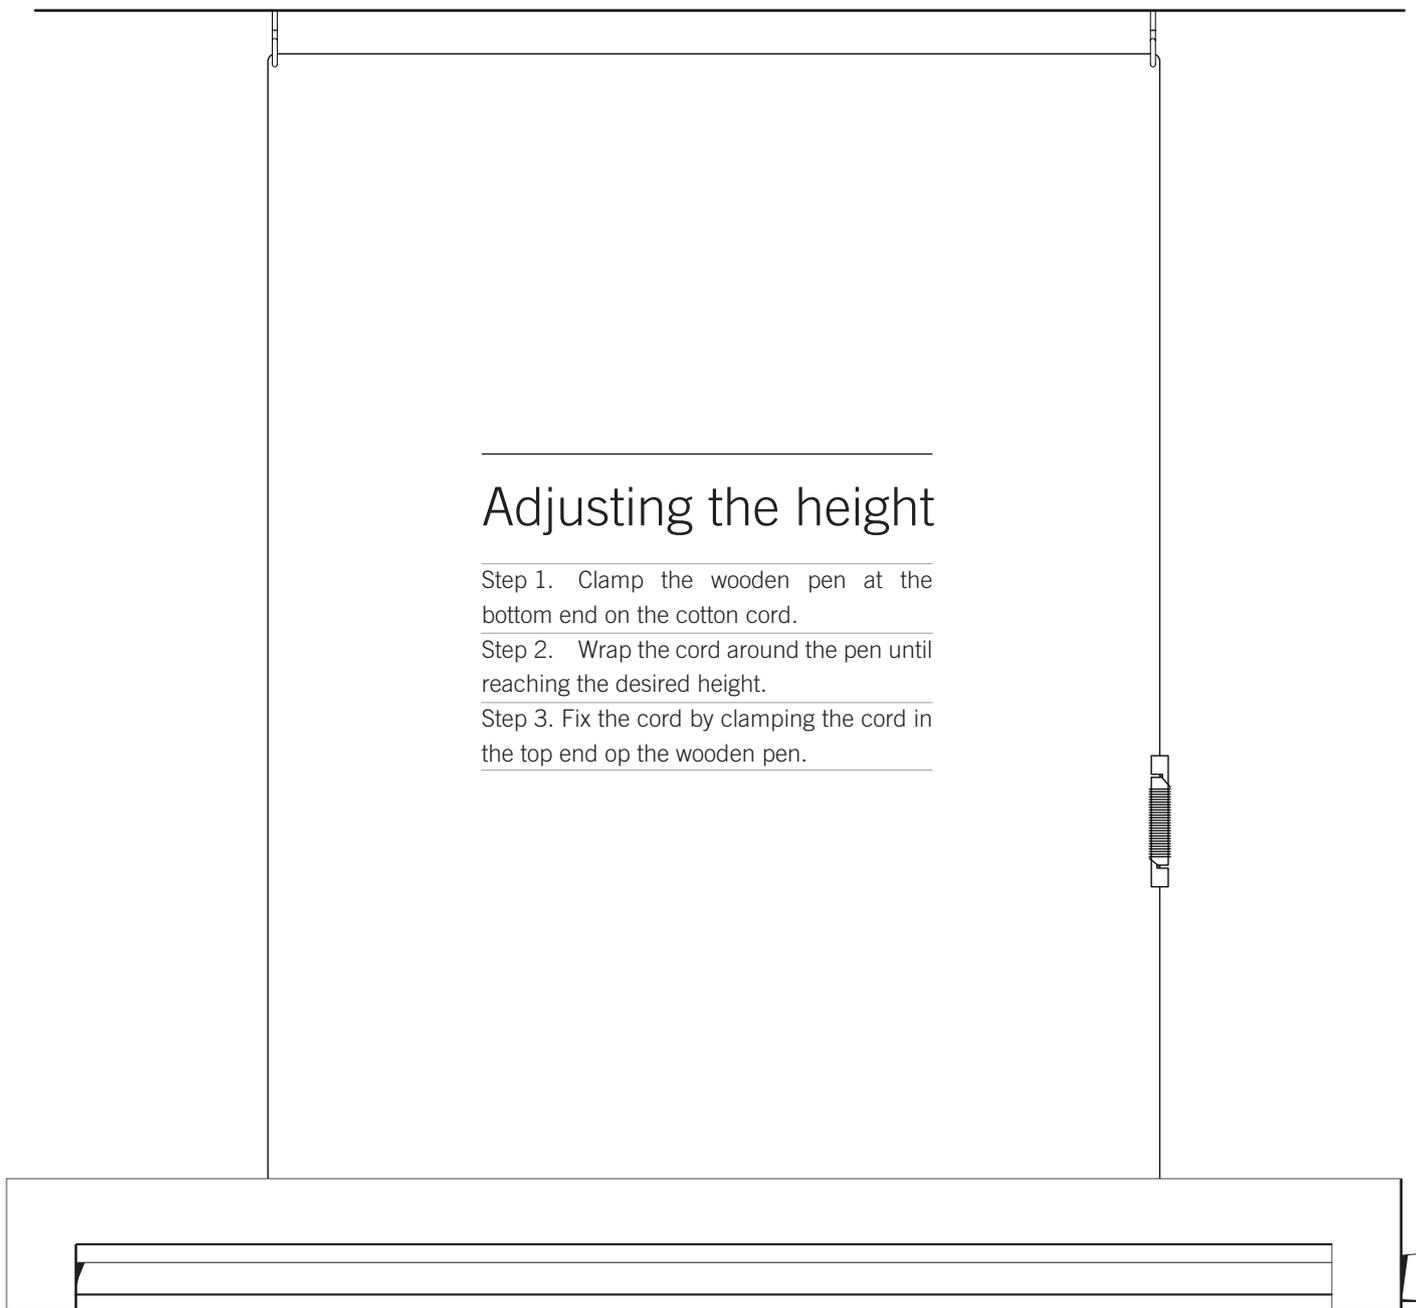

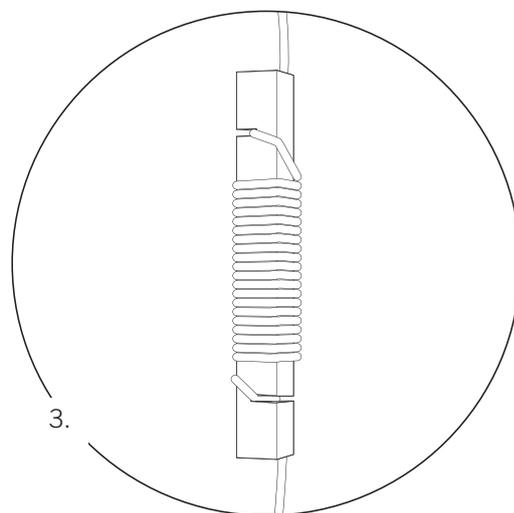

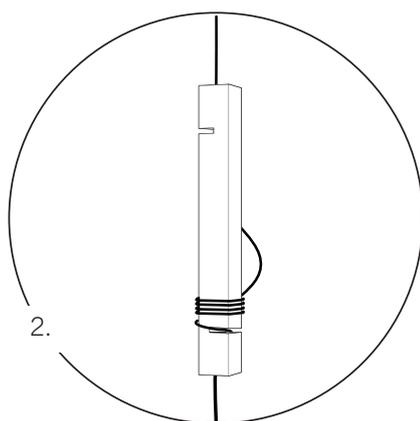

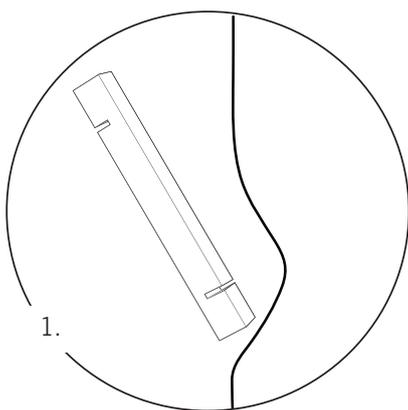

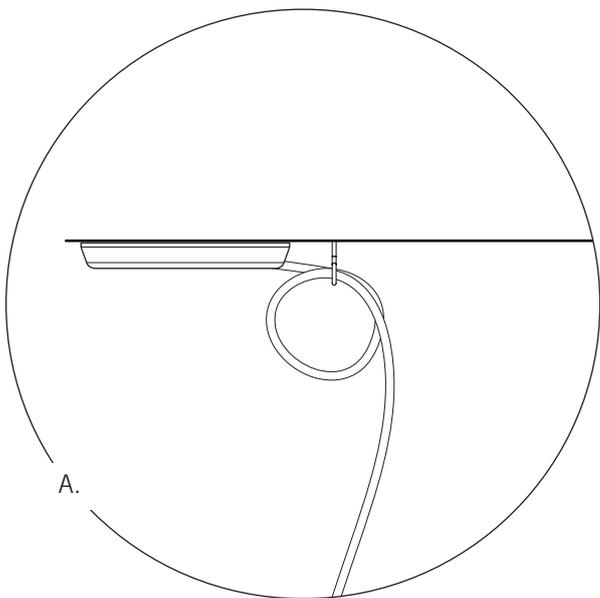

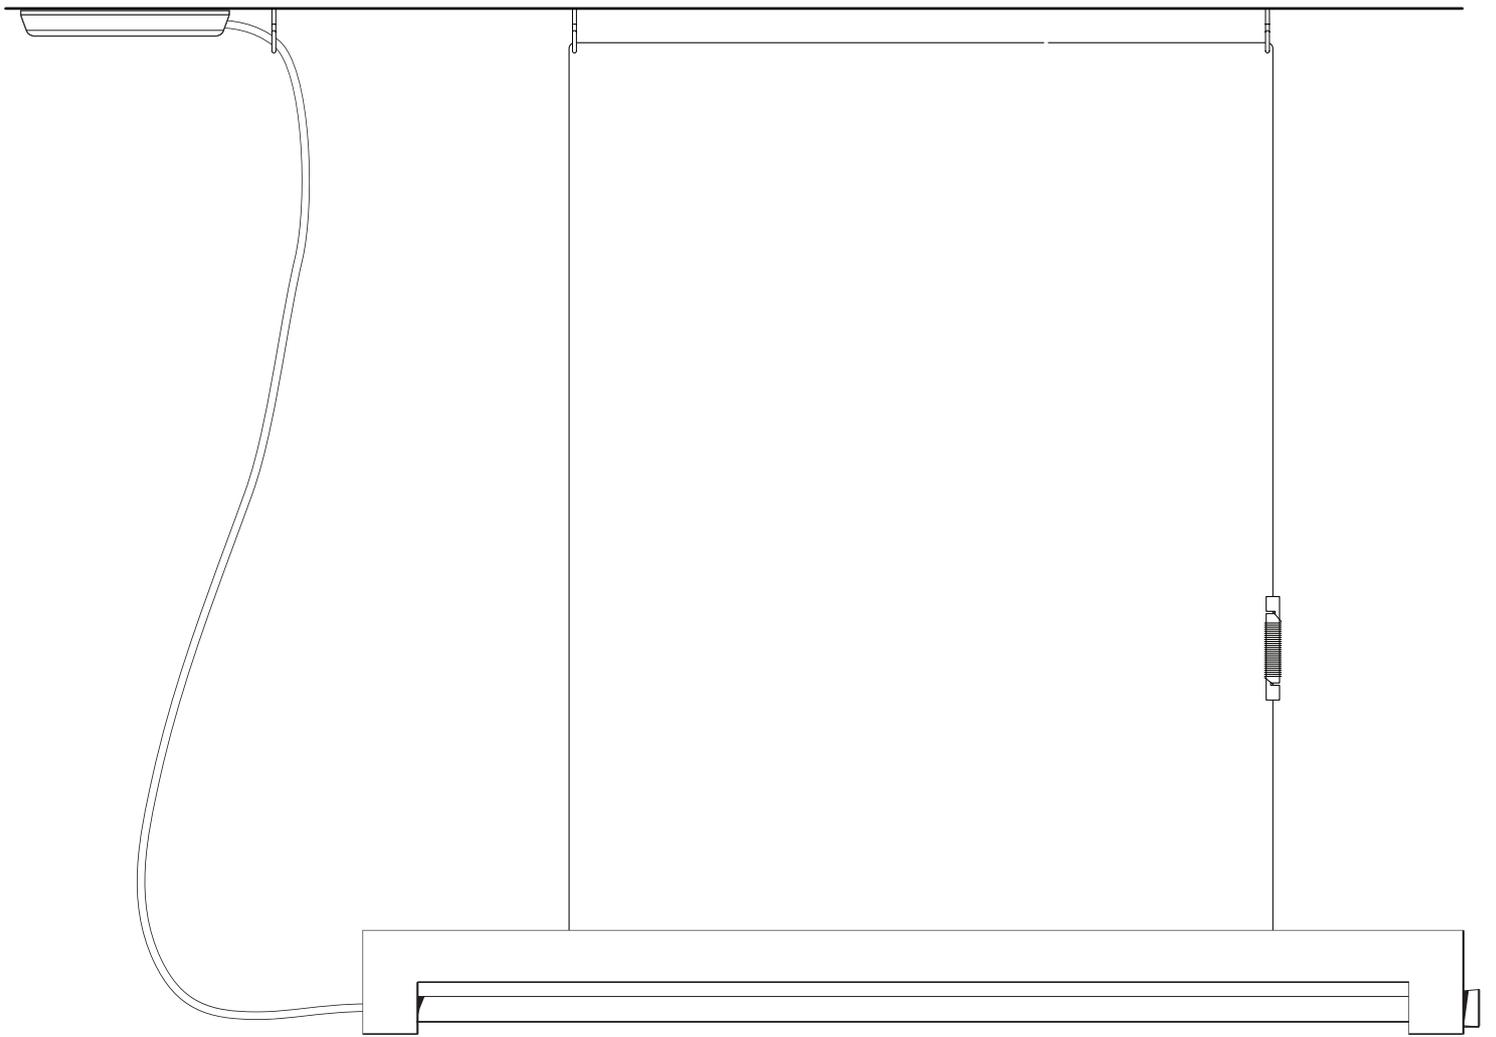

D. 1.

2.

3.

Adjusting the height

Step 1. Clamp the wooden pen at the bottom end on the cotton cord.

Step 2. Wrap the cord around the pen until reaching the desired height.

Step 3. Fix the cord by clamping the cord in the top end op the wooden pen.

1.

2.

3.

Power cord

Remove plug if installing power cord on the ceiling.
If needed, use an extra eye-bolt to hold the excess length of power cord (situation A.)

A.

Mounting on wall

Please note: have this lamp installed by a licenced professional.
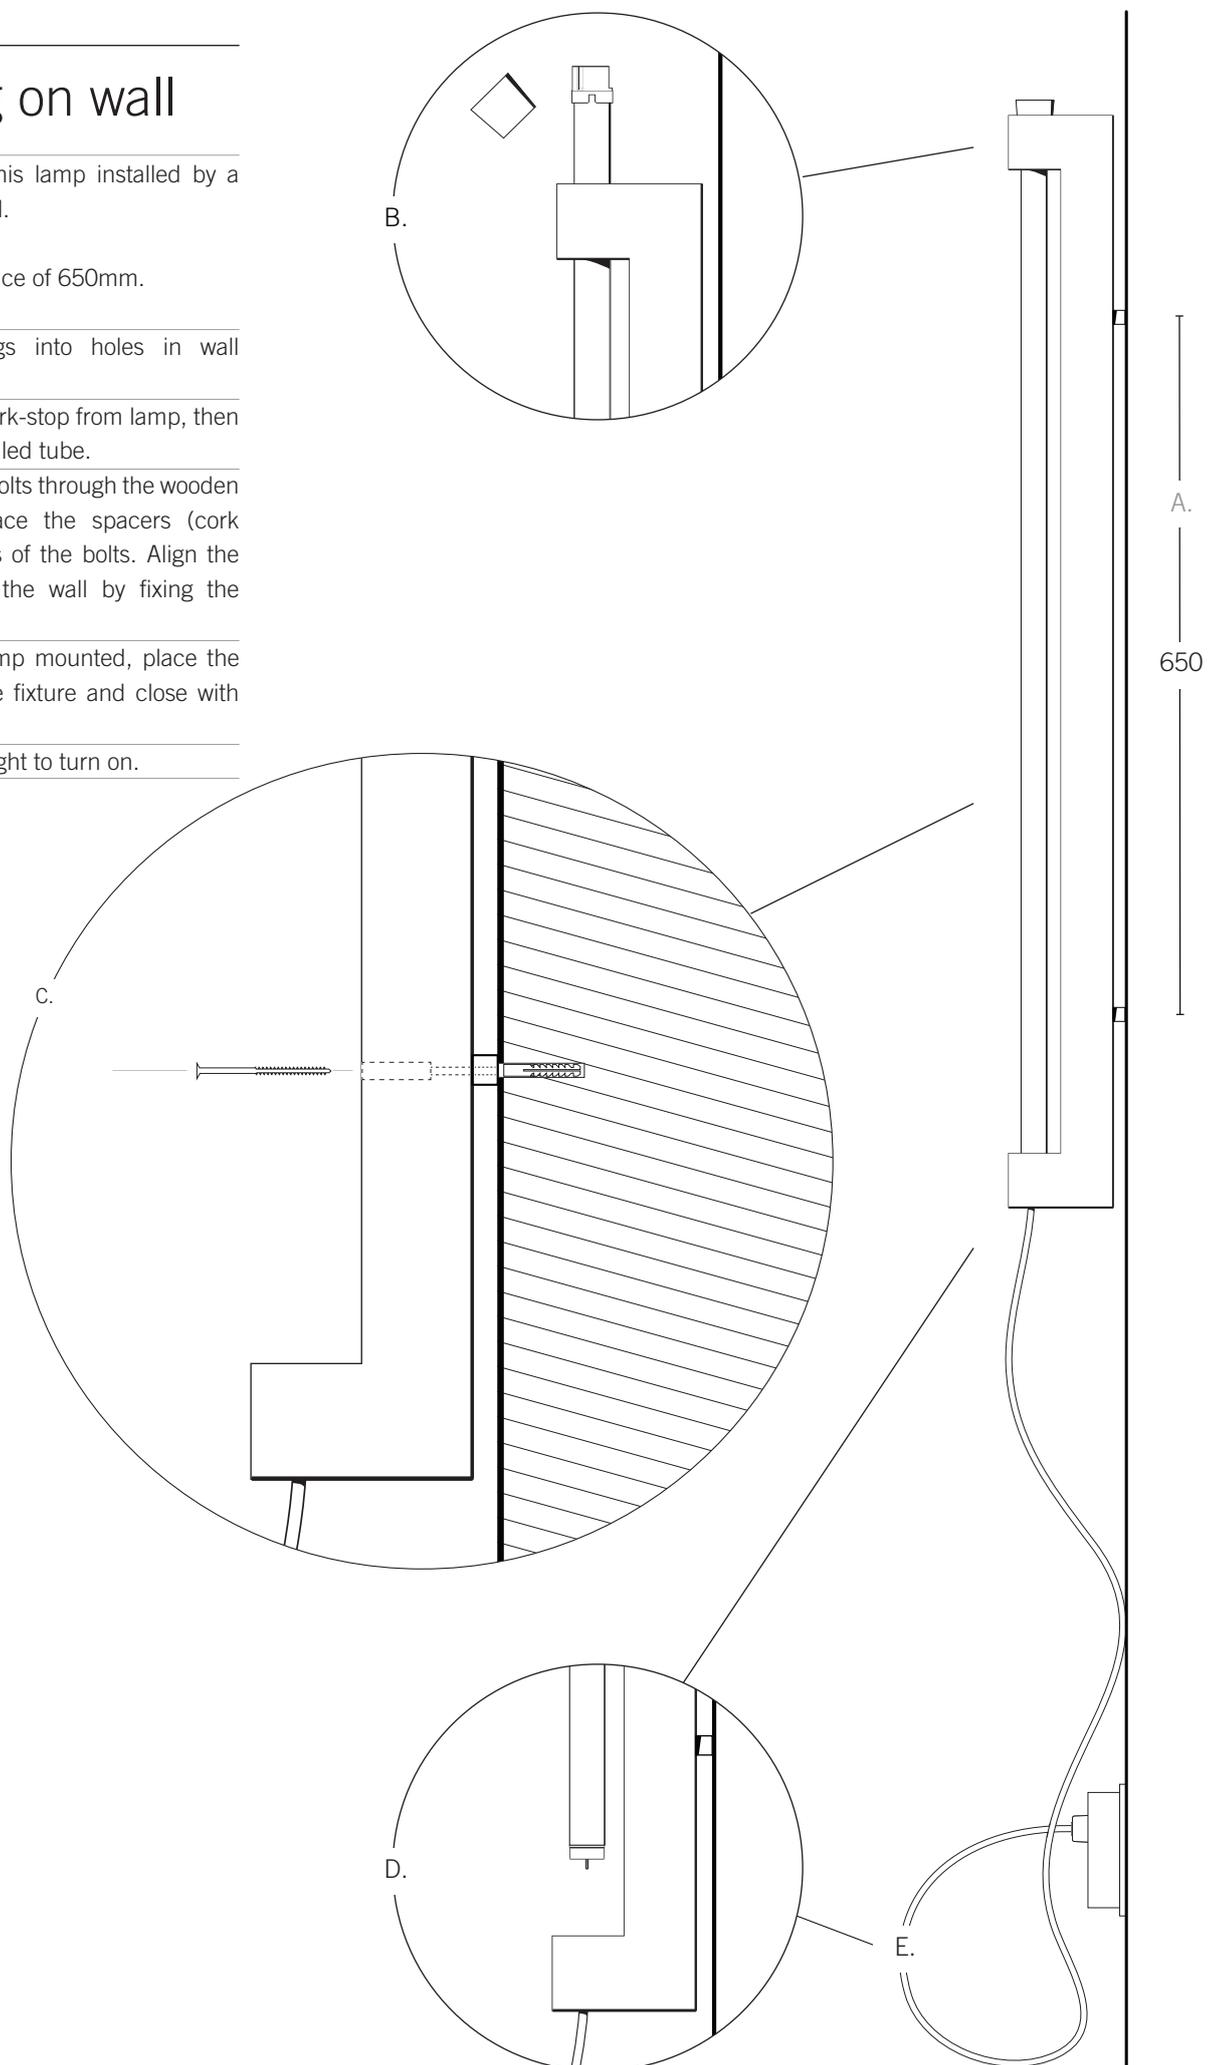

Drill holes at a distance of 650mm.

Step A. Insert plugs into holes in wall (plugs not included)

Step B. Remove cork-stop from lamp, then carefully remove the led tube.

Step C. Place the bolts through the wooden light-fixture and place the spacers (cork disks) over the ends of the bolts. Align the light-fixture against the wall by fixing the bolts inside the wall.

Step D. With the lamp mounted, place the led-tube back in the fixture and close with cork-stop.

Step E. Plug in the light to turn on.
