

“O” Train Tickets for Targets and Sources

The “O” train ticket design may be as simple or ornate as you wish. The essential feature of the tickets is that they clearly denote the student’s role during the ride (i.e., a “T” for target or an “S” for source). The tickets below are modeled on those used by the State Rail Authority of Sydney, Australia. If several classes are to use the materials, you may wish to laminate the tickets in order to minimize wear and tear. Although we typically print the tickets in color, they are also effective in black and white.
