

PRE-OP PREPARATION FOR CHEMICAL PEEL

PRE-OP PREPARATION FOR CHEMICAL PEEL

1. Retin A 0.05% Cream at night before bed at least 2 weeks prior to the procedure.
2. Ecotrin: 1 tablet 4 times per day or aspirin: 2 tablets 4 times per day for 24 hours prior to the procedure.
3. No moisturizers for 48 hours prior to the procedure.
4. Thoroughly wash face on morning of, or two hours prior to, the procedure.
5. Bring someone to drive you home.
6. Fill your prescriptions for Vicodin, Keflex, or other antibiotic, and Zovirax.

OPERATIVE PROCEDURE

1. Hibiclens wash upon arrival.
2. Valium under tongue upon arrival.
3. Acetone scrub.
4. Application of peeling agents.
5. Post-application soak for 15 minutes.
