

CD JEWEL CASE TRAY CARD

If you are planning to use a black tray card you only need to use the first page of this template. This will be the back cover of the Jewel Case when it is closed.

If your album needs a barcode, we typically place it into a 1.125" x .5" white box, so design with this in mind.

A good way to design tray cards is to refer to some existing jewel cases you may already have on hand.

CD JEWEL CASE TRAY CARD

If you are planning to use a clear tray this panel will be inside the Jewel Case behind the CD.

A good way to design tray cards is to refer to some existing jewel cases you may already have on hand.
