New Business: Replace some streetlights on Walbridge Place and Klingle Road

[7:37 pm] Jack and Stuart collectively introduced this resolution:

Resolved, that ANC1D asks the District Department of Transportation to assess the feasibility and cost of replacing some of the "cobra" streetlights on Klingle Road NW (2000 block) and Walbridge Place NW (3200 block) with Washington Upright streetlights.

Why: The Washington Upright streetlights are the preferred streetlights for the residential streets of this historic district. Besides wanting the historically correct streetlights, residents note that the sidewalks along these blocks are very poorly illuminated by the cobras, because the lamp of the cobra streetlights is above the tree canopy, thus illuminating the center of the street well, but leaving the sidewalks in darkness.

We presume that these blocks have cobra streetlights because they are designated "minor arterials". We propose that the cobras be retained at the Park Road and Adams Mill Road intersections, for full illumination of those intersections. But along these blocks, the cobras can be replaced with Uprights and still provide adequate illumination of the streets, because Klingle and Walbridge are narrow (29 feet) streets. The spacing of the streetlights is perhaps greater than optimal, but the Uprights will still provide better illumination of the sidewalk, especially given the directional enhancement possible with LED lamps.

We propose specifically that the following cobras be replaced with Washington Uprights, yielding adequate illumination of the streets, and greatly improved illumination of the sidewalks:

- (1) 2026 Klingle
- (2) Rosemount Avenue, corner of Klingle (Rosemount's not an "arterial")
- (3) 2017 Klingle
- (4) 2006 Klingle
- (5) opposite 3236 Walbridge
- (6) 3228 Walbridge
- (7) 3219 Walbridge
- (8) behind 3201 Adams Mill Road.

Resolution approved, 5 to 0 vote.
