ABSTRACT:
Since launching in 2008, Citizen Schools New York has served over 7,306 students, partnered with over 209 corporate and community partners, and engaged over 5,237 volunteers.

INNOVATION SPOTLIGHT:
This fall, CSNY is pioneering a year-long coding immersion program: Coding Academy. Our hope is that this program will inspire students to pursue STEM careers, and by 2019 we plan to offer it in all CSNY schools. In Coding Academy, students will:
- Match 1:1 with a Google software engineer who will serve as their Coding Coach
- Travel offsite to Google NY headquarters
- Master several coding languages including HTML and JavaScript
- Build a fully functional website for their school community

FACT: In 2017, students at Isaac Newton Middle School on average increased proficiency by more than 10% on the state math and ELA exam - more than double the gains seen for all middle school students in NYC.
