

INDUSTRY EXPERIENCE

Shawn has been in the industry since 2000 and has experience as both a mechanic and a driller. He brings incredible skill and insight to his role as a Repair and Maintenance Manager for National. In addition to overseeing all scheduled repairs and maintenance to National rigs and support equipment, Carroll is responsible for directing and supervising seven mechanics in the company's Elko, Nevada field office, the maintenance of rigs purchased by National and ensuring that equipment, tooling and rigs run smoothly and productively on all projects in the Western United States.

Prior to National, Carroll worked for Lang Drilling and Boart Longyear as a RC and Water Well driller and later as a mechanic. Carroll holds an Associate Degree from Great Basin College in Elko, Nevada. As part of Great Basin's MTC program, Carroll gained valuable knowledge and earned a welding degree that has aided him as a repair and maintenance manager.
