## EDUCATION

**M.A. Artists' Film and Moving Image**, Goldsmiths, University of London, 2024

Graduated with Distinction

**Dissertation:** *The Tender Manoeuvre of a Hand Releasing: A Choreographic Writing on Touch and Gestures of Intimacy*

- Explored embodied cinema, somatic memory, and phenomenological approaches to film, integrating choreographic writing methods and sensory ethnography.
- Advisors: Gail Pickering, Janice Kerbel, Stephen Johnstone, Maeve Brennan

**M.F.A. Fine Art** (Coursework), Goldsmiths, University of London

- Focused on moving image installation, analog film processes, sculpture, and interdisciplinary methodologies bridging performance, ecological practice, and visual culture.

## ART PRACTICE AND RESEARCH INTERESTS

Primary research interests include the intersections of embodied cinema, ecological thought, and somatic praxis within expanded moving-image installation. Grounded in phenomenology, material agency, and critical ecologies, my work investigates how audiovisual forms can evoke sensory experiences of intimacy and healing. I utilize quantum entanglement as both a conceptual framework and structural principle to examine how film functions as an ecotone where human, more-than-human, and ancestral presences converge. Recent work engages haptic visibility, the interplay of analog and emergent media technologies, and the ethics of spectatorship, ultimately reimagining the cinematic encounter as a dynamic, interconnected field of relations unfolding across Deep Time.
