NOTICE OF INTENT
TO ADOPT MITIGATED NEGATIVE DECLARATION
INTERIM TOTAL TRASH CAPTURE DEVICE (TTCD) INSTALLATION
IN ESTUDILLO CANAL TO COMPLY WITH RWQCB MRP SECTION 10

ALAMEDA COUNTY PUBLIC WORKS AGENCY

The Alameda County Public Works Agency is implementing San Francisco Bay Area Regional Water Quality Control Board (RWQCB) certified full capture systems of trash treatment control devices (TTCD) properly sized to trap particles 5 mm and greater and trash debris in channel flows in the region specific 1-year, 1-hour design storm, without causing adverse hydraulic effects upstream. The TTCD will be located in Estudillo Canal between Washington Avenue and I-880 Freeway (Figure 1).

TTCD will be installed on the bottom of the existing concrete lined rectangular channel. A new 48” high concrete weir to direct trash debris laden low flows into the six linear trash treatment control devices will be constructed. The existing concrete flow restrictor wall opening downstream of the devices location enlarged to increase flow discharge to compensate for the potential hydraulic effects of the TTCD in the channel.

The Draft Mitigated Negative Declaration (MND) and the initial study upon which it is based are available for review at the Alameda County Public Works Agency Offices, 399 Elmhurst Street, Hayward, CA 94544 and accessible at Public Works Agency Website: http://acgovt.acgov.org/pwa/library/environmental.htm. The document concludes that with proposed avoidance and minimization measures, the project would not result in significant adverse impacts. If you disagree, please include your reasons with your written comments. The Alameda County Board of Supervisors will consider the MND and all comments received prior to its adoption or approval of the project. Written comments will be accepted during the public review period December 3, 2018 through January 2, 2019. Comments should be emailed to Kwablah@acpwa.org or send by US mail to the address below:
