

Alex Mattson

Software Engineer
San Francisco, CA

Projects

Full Stack Developer - Job Logged (www.joblogged.com)

- Created site for job application management to help fellow job seekers at App Academy.
- Built on React-Redux and integrated with Ruby on Rails, and PostgreSQL through jQuery AJAX.
- Integrated Gmail API to automatically pull email correspondence for an application based on application contact's email.
- Built modular, custom JavaScript animations for site forms.
- Designed original, clear and efficient UI and UX using HTML5 and CSS3/SASS.

Experience

Senior Financial Analyst and Head of Acquisitions @ LeFever Mattson Inc.

May 2014 – June 2016

Designed real estate valuation models and algorithms in VBA. Completed sourcing of deals, underwriting, due diligence and start to finish acquisitions of properties. Closed over \$60,000,000 in deals for the fund. Ran the creation, and build out, of the commercial sector of the firm.

Co-Founder @ Waves Off Campus

December 2011 – April 2014

Created a company catering to Pepperdine Students looking for off-campus housing. Represented 40 clients on residential leases (25% YOY rev. increase). Managed a software-developer for creation of custom online portal.

Realtor @ California Investment Properties

August 2011 – June 2016
