

## Volunteers with Suspected or Confirmed Zika Virus Infection Needed for Research Study

There is currently an urgent need to better understand the effects of the Zika virus on our body and how our body responds to the Zika virus infection. This information can be used to help develop a vaccine as well as better diagnostic & therapeutic tools in the future. No treatment or drugs will be given in this study.

### You may be eligible if you:

- are between 15 and 70 years of age
- have *suspected* Zika virus Infection **OR** *confirmed* Zika virus infection
- are a resident of the United States
- Willing to provide bodily fluid samples over the course of a year

### This study involves:

- 1 enrollment visit
- up to 6 follow up clinic visits in a one-year period
- \$75 per visit for your time and travel-related expenses
