

# COMPLEXION

## PERFECT BRONZER

### STORY

It took us almost a half a year to create a bronzer that we could bring into LimeLight with pride! It had to be warm but not glittery. It needed to be light and natural and make you look like you had a real tan. We also wanted it to serve as a warm glow for darker complexions. Dozens of revisions later, we found our bronzer!

### BEST WAY TO USE

To apply bronzer, dust a small amount, building if necessary, on all the areas of the face that would get "kissed" by the sun - such as the top of the nose, the center of your forehead, your chin and cheeks.

### INGREDIENTS

Mica, Talc, Nylon-12, Octyldodecyl Stearoyl Stearate, Dimethicone, Trimethylsiloxysilicate, Hydrogenated Lecithin, Zinc Stearate, Silica, Phenoxyethanol, Ethylhexylglycerin, **[+/- (May Contain):** Titanium Dioxide (CI 77891 ), Iron Oxides (CI 77 491, CI 77 492, CI 77 499)].
