## WATERPROOF COMPLETE CONCEALER AND PRIMER

### STORY

This product became famous within the professional makeup artistry world decades ago when Kevyn Aucoin used it as his foundation on all of his celebrity and supermodel clients. Since then, this concealer has been a makeup artist staple.

In the professional world this concealer is called Dermacolor Camouflage Creme and is made by Kryolan, which has been supplying the film, theater and television industries for over sixty-six years, making them one of the world's first professional makeup brands. Kryolan's raw materials are of highest purity exceeding the requirements and expectations for cosmetics. To meet outstanding quality standards they cooperate with leading dermatologists and accomplish ongoing clinical tests to ensure excellent skin compatibility.

This camouflage creme covers all — from skin anomalies to tattoos, especially when sealed with our Perfect Pressed Powder. Waterproof and recommended by dermatologists, it's the perfect formula.

### BEST WAYS TO USE

Since this concealer is wax-based, it does need to "warm up" in order to apply smoothly. Use a concealer brush and spin it in a circular motion until the texture becomes more pliable. Fingertips can be used by customers during their personal use and applied by dabbing onto problem areas. A sponge or brush can be used to blend the concealer. Top with foundation for added coverage and uniformity, or use alone.

The wax component also makes this an excellent primer for eyeshadows. Apply using a dabbing motion, to the eyelid and browbone (avoid the crease area) and roll or dab the eyeshadows on top. Then with a similar dabbing or light swiping motion use a brush or sponge to blend the shadows.

Although this concealer is incredibly opaque, it can be very effective and natural-looking when used correctly. Results will be less desirable if applied to skin that is too dry, very oily, or contains deep wrinkles.
