Wednesday, February 6th  9:00-14:00

Georgetown Public Safety Operations & Training Center, Classroom A

3500 D B Wood Rd.
Georgetown, TX 78628

RSVP info on the back

AN INTERACTIVE PLANNING TOOL
AICP & CFM CREDITS AVAILABLE
The Community Health and Resource Management (CHARM) platform is an interactive and collaborative mapping tool. It helps communities see how planning decisions made today impact tomorrow’s communities.

CHARM is about ‘Growth in all the right Places’. How many homes are we putting in harms’ way? Are we building resilient communities?

This is a Texas A&M program that uses a low-cost, interactive table-top interface so people can build their own towns and cities using local data about floods, habitat, critical facilities, and more. It allows over a dozen development styles.
