Extended Learning Programs

The mission of Extended Learning Programs is to provide highly effective educational experiences beyond school hours. We serve MNPS through direct and indirect services. Whether that is through one of our Extended Care sites, grant funded clubs, or community partners, we believe equity, quality, and opportunity are key to a robust extended learning experience.

CONTENTS OF VOL. 4:

- Happy fall, friends! The cooler weather is here and we are chillin’. Be sure to wash your hands and take care of yourself!

- Extended Care has resumed and our sites are having all kinds of fall fun! We are working on fine motor skills, art concepts, types of weather, and social emotional learning! Students are enjoying being with their friends and have done a great job of social distancing and wearing their masks.

- Turnip Green Creative Reuse, Fine Arts Matters, and Cumberland River Compact all have clubs on our Virtual Afterschool Club calendar. Be sure to check it out! https://www.mnps.org/virtual-afterschool

- Whether you have returned in person or are still learning virtually, you have a system of support available to you! Be sure to communicate with your Navigator, counselor, teacher, or principal!

- Would you like to be a virtual guest for one of our Extended Care sites? You could read aloud or teach a dance. We’d love to have you engage with our students!

- At least two opportunities for your participation will be offered this semester!

- Ways to focus on gratitude during this time:
  - Write things you are thankful for on a piece of paper and create a thankful tree
  - Write one thing each day you are thankful for and tell a friend
  - Come up with 1 way to brighten someone’s day each day in November. Then do those things each day in December.

- Let us know how we’re doing! We want to hear from YOU!
