OUR MISSION
To provide quality, accessible substance use prevention and intervention for workplaces and communities.
Greetings from PAS!

We are so pleased to present our 2017-2018 Annual Report for your review. Inside you will find program accomplishments, updates on special projects and year-end financials.

Increased SBIRT Funding

We are excited to report that House Bill 18-1003 passed in the 17-18 legislative session, resulting in increased support for SBIRT beginning in July 2018. Training, technical assistance and screening implementation will be expanding.

Peer Health Assistance Programs

Staff and research consultants developed a client evaluation to better understand how clients benefited from the programs. This confidential evaluation survey was designed to collect detail on program services related to substance use, mental health and physical health for professionals. PAS will work to publish findings.

We have worked throughout the year to develop a new client database. The custom built application will expand our data collection capacity and streamline reporting processes.

Program utilization has continued to increase. One thousand licensed professionals accessed services this year. The trend for seeking assistance on a voluntary basis is the highest to date.

Annual Awareness Event

Dr. John Kelly delivered his outstanding keynote address in June, *Treating Addiction as a Chronic Illness*. An attendee remarked, “Now I understand why my son kept relapsing.” A sponsor reflected, “This is addiction science at its best!”
Providing oversight of our agency, the board is continually impressed with the accomplishments of our staff and the care for our clients. We are grateful for the support of so many.

The board and the management team remain mindful of our strategic focus on the prevention and intervention continuum, taking time to assess the talents within the organization and the environment in Colorado. The agency continues to grow and evolve, using our expertise to best meet our mission.

Thank you!

Jill Taylor, MSN, RN
Board President

Elizabeth M. Pace, MSM, RN, CEAP, FAAN
Chief Executive Officer

Adapted from SAMHSA
We had a wonderful annual event in June, with 175 in attendance for dinner and keynote presentation.

Simulation stations were set up with the One Degree app, which attendees could access throughout the evening. We presented this year’s Founders Awards to OMNI Institute, Representative Brittany Pettersen and Senator Cheri Jahn.

Our keynote speaker was Dr. John F. Kelly, Professor of Psychiatry in Addiction Medicine at Harvard Medical School and the founder and director of the Recovery Research Institute at Massachusetts General Hospital in Boston. Dr. Kelly presented the science of treating substance use disorder as a chronic illness.

Visit recoveryanswers.org to access more research by Dr. Kelly and his team at the Recovery Research Institute.

TREATING SUBSTANCE USE DISORDER AS A CHRONIC ILLNESS
Excerpts from Dr. Kelly’s Keynote Presentation

Words matter: the words we use to describe drug and alcohol use disorders contribute to stigma around these conditions. People with eating-related conditions are always referred to as “having an eating disorder,” never as “food abusers.”

So why are people with substance-related conditions referred to as “substance abusers” and not as “having a substance use disorder?”
In 1999, the Peer Assistance Services board of directors created the Founders Award to recognize individuals, foundations, corporations, community organizations and others who have made outstanding contributions to further the mission of our agency. The Founders Awards were presented at our Annual Awareness Event. We were pleased to honor the following recipients:

**OMNI Institute, A Non-Profit Social Science Agency**

*Award presented to Jean Denious, PhD, CEO*

OMNI Institute was founded in 1976 to support nonprofits, foundations and government agencies in a wide variety of project areas including behavioral and public health. OMNI Institute has collaborated with PAS on program evaluation, publication research and development, client surveys, database design and management, consultation on grant writing and served as researchers and co-presenters at national conferences. OMNI Institute has been a valued partner for almost two decades.

**Representative Brittany Pettersen**

Representative Pettersen is a member of the Colorado General Assembly, representing the 28th House District in Lakewood. She served as Chair of the Opioid and Other Substance Use Disorders Interim Study Committee, working closely with other legislators, community organizations and experts. The committee introduced six bills to the legislature to address the substance use epidemic. Representative Pettersen has worked to destigmatize the illness of substance use disorder and to support prevention, treatment and recovery.

**Senator Cheri Jahn**

Senator Jahn is a member of the Colorado General Assembly, representing the 20th Senate District in Wheat Ridge. She is well known for her advocacy of treatment for those with substance use and mental illnesses. Senator Jahn served on the Opioid and Other Substance Use Disorders Interim Study Committee. The committee was charged with identifying gaps in prevention, intervention, harm reduction, treatment and recovery resources and developing legislation to address these gaps. As the Interim Committee addressed the opioid crisis, Senator Jahn kept a focus on the prevalence and harm of alcohol use.
Selected Presentations

Colorado General Assembly 2017 – Denver, Colorado
Opioid and Other Substance Use Disorders Interim Study Committee
Carolyn Swenson, MSPH, MSN, RN, Manager, SBIRT Training and Consultation
Elizabeth Pace, MSM, RN, CEAP, FAAN, CEO
Cyrille Adam, Senior Director, Health Programs, Kognito Solutions
Bethany Pace-Danley, BSW, MA, Manager, SBIRT in Colorado

PAS was fortunate to provide a presentation to the committee on SBIRT.

Throughout the interim and legislative sessions, PAS provided testimony to the Opioid and Other Substance Use Disorders Interim Study Committee, as well as to the Senate State, Veterans and Military Affairs Committee, House Public Health Care and Human Services Committee and House Appropriations Committee.

National Cannabis Summit 2017 – Denver, Colorado
Lessons Learned from Ten Years of Cannabis Screening and Interventions in Colorado
Carolyn Swenson, MSPH, MSN, RN, Manager, SBIRT Training and Consultation
Melissa Richmond, PhD, Director of Research and Evaluation, OMNI Institute

An overview of SBIRT implementation in primary care and emergency departments throughout Colorado post marijuana legalization.

International Nurses Society on Addictions 2017 – Orlando, Florida
Why Screening Matters: What Practitioners Need to Know and How to Intervene Early
Emily Schrader, MA, LPC, CAC III, SBIRT Trainer

A presentation on the importance of SBIRT and what nurses can do to champion early intervention, along with a brief training on SBIRT steps.

Colorado Dental Association Lunch and Learn 2018 – Crested Butte, Colorado
More Than an X-Ray: Screening Beyond Teeth
Katherine Garcia, MA, LAC, MAC, Clinical Services Manager, Peer Health Assistance Programs
Manali Gadgil, MA, Case Manager, Peer Health Assistance Programs
Brett Kessler, DDS, Chairperson, Colorado Concerned Dentists

This short training covered an important but overlooked area of prevention in dentistry: screening for alcohol and drug use. The focus of this presentation was primarily on alcohol use in adults but a similar approach can address marijuana, nonmedical prescription and other drug use. The same approach is appropriate for alcohol and drug use prevention in adolescents.

Panel Presentation: Your SAMHSA Grant is Over, Now What?
Bethany Pace-Danley, BSW, MA, Manager, SBIRT in Colorado

PAS presented on the innovative funding strategies for the continuation of SBIRT efforts in Colorado.
All In Colorado
Prevention for Working Adults: Substance use education for employers and employees

A statewide program that educates employers and employees about the harms of substance use and related issues. Policy consultation for employers and no-cost training for supervisors is provided.

**WHAT’S NEW**
Talking with those around us about alcohol and other substances can help prevent disease and injury, improve family and work life and promote overall well being. All In Colorado has launched a new mobile app with an interactive simulation to practice non-confrontational, non-judgmental conversations about substances with coworkers or employees whose use is affecting their work.

By practicing talking with virtual humans, individuals learn how to navigate these conversations in real life.

**Funded by:**
Office of Behavioral Health
Colorado Department of Human Services

Along with traditional print and broadcast channels, emerging social media and networking tools such as podcasts, blogs and popular sites like Facebook, Twitter, YouTube and Instagram not only entertain us, they also help shape our views and values. These media can be used as a strategy to address the prevention of substance use issues.

- Substance Abuse and Mental Health Services Administration, Focus on Prevention.
  HHS Publication No. (SMA) 10–4120.

If someone is impaired at work they put a lot of people and families at risk ... and so being a resource for those organizations ... says it all.”

Richard T. Lindsey, PhD

One Step Ahead
Substance use education and support for Parents and Caregivers

This statewide public awareness campaign focuses on improving prevention knowledge, skills and resources for parents. It also promotes healthy decision-making through an active social media campaign and trainings using the evidence-based Strengthening Families™ curriculum.

WHAT’S NEW
The first of many podcasts were launched in June 2018, featuring program staff discussing the scope of the problem and how to talk with young people about substance use. Planning for more podcasts is underway.

Funded by:
Office of Behavioral Health
Colorado Department of Human Services

"Not only did I learn skills to use with teens, but also with my partners and family.”
Training participant

"This training was awesome. This is what we need here in Pueblo.”
Training participant

EARLY INTERVENTION IS A BRIDGE BETWEEN PREVENTION AND TREATMENT
Early intervention consists of providing information about substance use risks, normal or safe levels of use, and strategies to quit or cut down on use and use-related risk behaviors, and facilitating patient initiation and engagement in treatment when needed. Early intervention services may be considered the bridge between prevention and treatment services. For individuals with more serious substance misuse, intervention in these settings can serve as a mechanism to engage them into treatment.

Screening, Brief Intervention & Referral to Treatment
Implementing early intervention practices into routine health care

Screening, Brief, Intervention, and Referral to Treatment (SBIRT) is an evidence-based intervention practice to identify, reduce and prevent misuse and severe problems with alcohol, marijuana, prescription and illicit drugs. We provide statewide training and technical assistance to health and mental health care professionals on SBIRT. We also provide targeted implementation support to clinics in northeast and southeast Colorado.

WHAT’S NEW
In 2018, we began a project to provide SBIRT training and technical assistance to CDPHE-funded school-based health centers throughout the state. Project services will increase in the coming years.

With the legislative success of HB18-1003, we will have the capacity to expand services to meet increasing demand for training and technical assistance. We’ll be increasing the number of trainings statewide, including targeted training to professionals who provide women’s healthcare.

UNIVERSAL SCREENING HELPS TO IDENTIFY RISKY USE EARLY
Alcohol screening and brief counseling can reduce drinking on an occasion by 25% in people who drink too much, but only 1 in 6 people has ever talked with their doctor or other health professional about alcohol use. Talking with a patient about their drinking is the first step of screening and brief counseling.
One Degree Awareness Campaign
Changing the conversation about marijuana and alcohol

Sometimes we are not sure how to begin a conversation when we recognize that a friend or family member seems to be drinking alcohol or using marijuana or other drugs in ways that could harm their health or get in the way of their goals. The One Degree app and website allows the general public to practice the conversation with a virtual human first and try out different approaches to the conversation to see what works best. It teaches skills that are nonjudgmental and non-confrontational, with a focus on helping someone find their own best reasons and approaches to change alcohol or drug use. One Degree is private and a virtual coach provides helpful input and feedback. Anyone can download the app for free to practice conversations and transform the way we talk about alcohol and other drugs with our friends, family members and co-workers.

WHAT'S NEW
We are excited to receive the funding needed to expand the reach of our One Degree campaign and develop an adult-to-youth conversation for the app ... coming in 2019!

Funded as a part of the SBIRT program by:
Colorado Department of Health Care Policy & Financing
Signal Behavioral Health Network

“Skillful, collaborative conversations are powerful tools to improve physical and mental health. Having the skill and motivation to engage in such conversations can truly transform the health and well-being of those you interact with.”

Albright G, Adam C, Serri D, Bleeker S, Goldman R. Harnessing the power of conversations with virtual humans to change health behaviors. mHealth 2016;2:44.

25% of Americans drink at levels that could lead to health or other problems – yet, most people who drink too much do not have a serious alcohol use disorder – or what we used to call “alcoholics.” Talking with those around us about alcohol and other substances can help prevent those disorders, avoid diseases and injuries, improve family and work life and promote overall well-being.

Peer Health Assistance Programs
Providing healthcare professionals with the support they need

These programs provide assessment, referral, long-term case management and monitoring for health and mental health professionals with physical, emotional, psychiatric, psychological or substance use conditions affecting practice.

This year, we served 1,000 health and mental health professionals including RNs, LPNs, pharmacists, pharmacy interns, dentists, dental hygienists, veterinarians, social workers, licensed marriage and family therapists, certified addictions counselors, registered psychotherapists, licensed professional counselors, psychologists and other health professionals. We are encouraged that as awareness increases, there is greater utilization of the programs and professionals are seeking help sooner.

WHAT’S NEW
The Peer Health Assistance Programs provided education and outreach regarding the importance of understanding and recognizing substance and mental health issues in the workplace to 2,700 professionals throughout Colorado. In addition, the Peer Health Assistance Program was proud to partner with large health systems to provide education to the nurse leadership and human resource departments.

Funded by:
Colorado Department of Regulatory Agencies

CASE MANAGEMENT SUPPORTS RECOVERY
Case management functions mirror the treatment and recovery continuum. Case management supports the client as he/she moves through the continuum, encouraging participation, progress, retention and positive outcomes.

- National Institutes of Health

I was an addict and alcoholic and was found out at my job for prescribing narcotics to myself. The way PAS handled it was very gentle and nurturing and they found an in-patient treatment center for me. I think I’m one of the people who was very lucky because many people don’t make it. Now, it’s so much easier to live, to be happy. It’s unbelievable how wonderful sobriety can be.”

A Nurse In Recovery

Learn more at PeerAssistanceServices.org
A Thank You Letter From a Client

I want to express my gratitude for the help you have extended to me in the maintenance of my sobriety over the last four years. Each and every one of you has truly lived up to your name, “Peer Assistance” and I never could have done it without your help!

My sponsor, who is also a nurse, and I have talked about your program many times and have likened it to a set of “training wheels” that I definitely needed to keep me from toppling over, especially in the beginning. The combination of case management with monitoring provided by the program has been an invaluable tool for my recovery. For those who have never had a problem with alcohol it might sound a little overly dramatic, but I won’t mince words, I owe my life to this program.

Again, I would just like to say, that the Peer Assistance Services program has made my life much more meaningful, and in fact, made it worth living.

Thank you very much!

WE ARE HERE.
We are always available when needed.

WE UNDERSTAND.
We understand substance use and all the ways it can affect someone’s life.

WE PROTECT.
We provide services with a balanced approach to protecting the public.

WE TRUST.
We build trusting and lasting relationships.

WE BELIEVE.
We believe in the person. We believe in the outcome.
