Imagine being able to sauté, scramble and sear in the same appliance that can handle soups and sauces. That's the versatility of a skillet.

Universe Plus tilt skillets take up less room under the hood with one of the smallest footprints on the market.

The fully polished stainless steel cooking surface keeps food from sticking. The 1 3/8-inch cast aluminum core provides perfect, even heat across the entire cook surface on electric units. Gas units have 3/4-inch triple-ply pan construction.

COUNTERTOP MODELS

1600-G 🔥

The all new 1600-G holds an amazing amount of food! The same versatility as the larger 30 and 40 gallon skillets but in an even smaller, 16 gallon, footprint.

Features such as Type 316 stainless steel cooking surface, 3/4-inch triple-ply pan construction plus ultra-smooth tilting make the 1600-G an incredible value.

Shown with optional
stand and drain

R-1600E ⚡

Round shape and sloped sides are perfect for stir frying and sautéing.

3/8-inch thick stainless plate cook surface provides even heat across the entire surface.

SafeStop™ tilting protects against accidental sloshing.

16 gallon R-1600E
shown with optional
stand and faucet

1200-E ⚡

Save even more space with the 1200-E, a 12 gallon electric skillet without giving up performance.

Even heating is ensured with full 1 1/2-inch thick aluminum casting.

SafeStop™ tilting protects against accidental sloshing.
