

Explore and Visualize your Data

A requirement for any learning management system (LMS) is the ability to provide complete insight that proves the effectiveness of your training and education programs. Current LMS offerings do not deliver on this requirement. Reporting capabilities in the LMS market today are limited in their ability to access and analyze the wealth of your data, and present it in a meaningful way. Their outdated approaches to running reports are time consuming, and leave users so full of frustration that many of them are driven to switching their LMS.

Lambda Zoola™ changes that!

Lambda Zoola™ is the only cloud-based reporting and analytics solution that helps you gain real insights from your learning data - in minutes, instead of days. Purpose-built for Moodle, Zoola™ gives users full control by delivering real-time access to all your learning data, unmatched visualization options and full flexibility to schedule and share information.

Lambda Zoola™ Benefits

- Spend less time** creating and running reports, and spend more time focused on learner success.
- Better understand** your learners to continuously improve learning and development programs and related resources.
- Assess the learning effectiveness** with powerful learning analytics, and use the insight to accurately understand where to invest in future learning.

Zoola™ helps you save hours of time so you can focus on what matters most.

LAMBDA ZOO LA FEATURES

<p>More Control over your Data Lambda Zoola provides access to all of your learning data. This means you control every table, every field and every row. You decide how it is viewed, how it is analyzed, how it is presented, and how and when it is distributed.</p>	<p>Out-of-the-box Reports Benefit from an ever growing list of reports and dashboards. The reports are crowd-sourced, meaning that they have been previously suggested by peers in your industry. Out-of-the-box reports are configurable so you have full control to match your exact requirements.</p>
<p>Ad Hoc Analysis Create your own unique reports. Decide fields you want to use, how you want them sorted and filtered, and how you want it presented. Leave it as a table or choose from a library of more than 30 different chart styles that best summarizes the results of your analysis. Further this analysis with a variety of calculated fields to perform mathematical and statistical analysis.</p>	<p>Time Spent Learning Reports Produce reports that accurately inform you of the actual time learners spend learning. The Lambda Zoola™ Time Spent Learning plug-in set tracks the time that learners spend in courses and modules within those courses. You analyze that time by course, module and across the organization for the insight you need to measure learning effectiveness.</p>
<p>Interactive Executive Dashboards Take all your ad hoc analysis and mash it up into an executive dashboard that is uniquely designed for your stakeholders. This single view, that can blend multiple data points on a single page, presents real-time data and drill-down/through capabilities to zero in on what matters most.</p>	<p>On-Demand Export & Report Scheduling Export reports to all the popular files including PDF, Microsoft Word, Excel and PowerPoint. For situations where reports are required at set intervals, the scheduler allows you to automate email delivery at the time and frequency desired.</p>
