

Some of the business we've incubated in bloom.space

iContract

Developing a platform for contract workers and recruiters - a place to find and manage work, liaise with colleagues and recruit new contractors.

Calipsa IO

Machine Learning startup with systems to monitor CCTV feeds, reporting automatically when events like accidents, thefts, congestion, etc occur.

Bloomsbury AI

A UCL spin-out using Natural Language Processing to create chatbots, invested in by Albion Ventures tech capital fund.

Aiden AI

A virtual assistant for marketing execs, utilising Artificial Intelligence to make marketing faster, affordable and more effective.

Total Seed Investment: £4.5m+

- Recruited UCL talent - UCL computer scientist postgrads, coders, Tech Entrepreneurship Masters students.
- Provided interns and project students - at no cost to the startup.
- Links to experts - UCL academics and researchers.
- Meeting investors in our network - each company secured its seed round while incubating in bloom.space.
- Low-cost office space - a combination of hot desks, fixed desks and unlimited free use of the meeting rooms.
- Meet-ups and social events - drinks after work in the office monthly, a chance to unwind, meet colleagues, collaborate and extend the personal network.
