  James Watt was a true man of the 18th Century Industrial Enlightenment. He believed in the power of knowledge to create ideas and that these ideas created immediate change. As a result he was a key figure in the development of the technologies, particularly the efficient steam engine, which would revolutionise industry and society forever. Professor Peter Jones, Emeritus Professor of French History at the University of Birmingham, UK, discusses a great man of the Enlightenment.

  In the late eighteenth and early nineteenth centuries, Birmingham was a city sitting at the heart of the enlightenment. The men of the Lunar Society - an informal group of friends who met during the full moon - advanced knowledge, exchanged ideas and changed our world forever. In this film we follow the new Lunar Society Trail, and learn more about these fascinating individuals.
