

Dear resident,

**Weeds!! Despair no further... ring us instead.**

Landcare and the Council are supporting residents to manage their weeds, especially environmental weeds.

Some weeds are major fire hazards such as sweet pittosporum. Others, such as wandering trad, ivy, holly and Spanish heath invade neighbouring properties – not a nice thing to do.

We have a wonderful ‘weed facilitator’, Mel. While we can’t do the actual work, she can help you ‘work smarter, not harder’ and there is also some money available if a contractor is needed. But get in quickly!

We are hoping to doorknock in your area and we look forward to meeting you then. **However we would urge you to contact us if you are interested and especially if you think your neighbours might be interested too. A Weed Neighbourhood may be coming your way!**

Best wishes from the project team.

**PS Want to get in early? call or email:**
