Pharmaceutical Industry SAS Users Group 2014 Annual Conference

June 11, 2014 Pottstown, PA – PharmaSUG 2014 was held at the Hilton San Diego Bayfront Hotel from June 1-4, 2014 in San Diego, California. Abundant sunshine filled the skies outside and SAS® programmers swarmed the floors inside the exhibitor and demos rooms. What a wonderful opportunity it provided to network with others within the pharmaceutical industry.

The conference was a great success! There were over 700 attendees and over 200 paper presentations, posters, and hands-on workshops. Four members of our Professional Services division were amongst those who presented. They presented papers on the following topics:

Section: Management and Support

Title: [MS12. Recruiting for Retention](#)
Authors: Kathy Greer and John Reilly

Section: Management and Support

Title: [MS02. Building Better Programming Teams with Situational Exposure Training](#)
Author: Elizabeth Reinbolt

Section: Healthcare Analytics

Title: [HA02. Common and Comparative Incidence Indicators of Adverse Events for Well-Defined Study Pools](#)
Author: John Gerlach

Section: Statistics and Pharmacokinetics

Title: [SP05. A SAS® Macro to address PK timing variable issues](#)
Author: Tim Harrington

Congratulations, on a job well done by all of you!

All of the papers presented at the PharmaSUG conference can be located at the following link - <http://pharmasug.org/2014-proceedings.html>.

We look forward to seeing you in Orlando, Florida from May 17-20, 2015 at PharmaSUG 2015!

DataCeutics

DataCeutics is a Functional Service Provider and Outsourcing Partner who is committed to quality. The foundation of our clinical research services are built upon our strong technical expertise in Statistical Programming, Data Transformations (CDISC), and Biostatistics. We couple our unparalleled passion for excellence with our experience in our core proficiencies across multiple therapeutic areas and disease states. This provides our clients with significant positive outcomes in all phases of their clinical trials and proven value in each sponsor engagement.
