Breaking Ground

Color Coordinates

Breaking Ground

Color Coordinates

The Breaking Ground Collection features two styles that offer high performance, functional aesthetics and great value. Mesa, inspired by sedimentary rock strata, is an organic texture suitable for most commercial interiors. Flatlands, named for the vast plains that cover much of the Earth, is an overall texture that is ideal for a monolithic look on the floor. Mesa and Flatlands can be used independently or as coordinates to landscape any floor.

The following guide assists to provide simple navigation for color coordination across our standard collections. Alternatively use our 3D 'Mix and Match' Virtual Simulator or our website (www.carpetsinter.com) to download and create your personalized interior spaces...
