

Carpets Inter[®]

PROJECT PORTFOLIO

**At Carpets Inter
your vision is our benchmark.**

Carpets Inter create modular carpet that delivers beauty and efficiency to our customers while providing sustainability for our planet. Our commitment ranges from the personal scale of making each space more livable through aesthetic appeal, durability and comfort underfoot to the global scale of making our world more habitable. By recycling over one billion plastic bottles in creating our products, we see ourselves as more than just a manufacturer, but a protector of our planet's well-being.

We take a leadership position in our industry as a good global citizen, dedicated to making a positive environmental, social, and economic impact around the world wherever our product is put to use.

Imagination is the only limit.

**THE SOLUTION TO CLIMATE CHANGE
IS JUST BENEATH THE SURFACE**
